July 23, 2026

Abstract

This treatise explores a fundamental structural omission in the classical tripartite architecture of modern democracy. By relegating intellectual property to a mere subsidiary of civil commerce, 18th-century constitutional design left the human mind vulnerable to systemic extraction by highly coordinated corporate-legal cartels. This essay theorizes the modern phenomenon of "Cognitive Slavery"—the systematic theft of an inventor's algorithms, designs, and cognitive output via state court capture. We argue that this systemic failure creates catastrophic national security risks by allowing unvetted local tribunals to route dual-use defense technologies to foreign adversaries, while fueling a self-perpetuating cycle of kleptocratic corruption. To protect human liberty, sovereign defense, and Democracy, Intellectual Property must be elevated to a core Pillar of Democracy and established as a sovereign, independent Fourth Branch of Government.

The Hypothesis

For the sake of argument, imagine a highly coordinated segment of the population—a specialized, insular professional circle—that utilizes advanced, proprietary methods to systematically target individuals for intellectual property theft. Through this mechanism, let us assume this "Enterprise" has monopolized a disproportionate share of the world's tangible resources. Imagine further that they have channeled these stolen resources to monopolize technological progress, creating a self-fueling loop of accumulation and advancement. It is a vast assumption, but let us accept it as a premise for this inquiry.

If we look at the blinding acceleration of technological breakthroughs over the last two decades, humanity appears to be thriving. Yet "thriving" is a dangerous descriptor; it is easy to conflate technological acceleration with collective human well-being, but the two are fundamentally distinct.

This hypothetical scenario raises a critical question: Is our rapid technological progress driven by this hyper-concentration of wealth, is it the direct product of systematic intellectual property theft, or is it a toxic combination of both?

If it is a combination, the premise is deeply counter-intuitive: how can a system founded on the systemic exploitation of the majority by a select few yield a globally desirable outcome?

To put it plainly: Does the rule of law act as a barrier to technological progress?

The paradox runs deep. We traditionally associate technological advancement with longevity, elevated standards of living, and societal evolution. Yet, in this scenario, progress is achieved by violating the spirit of every law on the books.

Organized, state-sanctioned intellectual property theft is not a mere white-collar infraction; it is the theft of the human essence—our capacity to dream, design, and create. One could easily argue that stealing a mind's creative capacity is a more profound violation than physical confinement. How can such a predatory mechanism serve as the engine of human advancement? Is this not simply a modernized, cognitive form of slavery?

THE INNOVATION PARADOX

If this predatory network succeeds over generations, it will eventually subdue every independent inventor on earth. The logical result is a terminal paradox: an absolute monopoly of resources paired with a total stagnation of creative output. Without independent creators, the engine of breakthrough innovation dies, inevitably triggering global economic collapse and systemic instability.

This structural contradiction forces us to confront four fundamental questions:

1. Is the organic, democratic distribution of resources naturally inefficient for rapid economic growth?
2. Are monopolistic systems inherently better suited for short-term technological breakthroughs?
3. Where is the tipping point? Can we predict the exact moment in a monopoly's evolution where short-term technological returns are maximized before the broader collective is destroyed?
4. Is democracy, by design, structurally disadvantaged when it comes to rapid technological competition?

To understand the mechanics of this paradox, one must examine how the state's own administrative legal apparatus has been weaponized. In modern society, the legal profession operates as a highly anti-competitive, self-regulated guild [2]. When this guild co-opts the data infrastructure of the courts [1], it establishes a highly efficient extraction mechanism. Inventors who seek to protect their cognitive creations through registration with the state are systematically targeted, resulting in a model of cognitive exploitation that degrades basic human liberty [3].

THE MARITAL CATEGORY ERROR: COGNITIVE AUTONOMY VS. COMMUNAL PROPERTY

At a more fundamental level, the vulnerability of the creative mind begins with how modern family law classifies the products of human thought. Historically, generalist courts have treated intellectual property created during a marriage exactly like a physical crop harvested on a farm or a piece of furniture built in a workshop: as "community property" or "marital property" subject to a fifty-fifty division.

We argue that this classification is a profound **category error** that violates the principle of **Cognitive Autonomy**. Our thoughts, our dreams, and our creative designs are not external, physical assets; they are the direct, inalienable externalization of our unique human personality. This is the foundation of Georg Wilhelm Friedrich Hegel's *Personality Theory of Property*, which posits that property is the first physical embodiment of human freedom, and that a creation of the mind is so intrinsically tied to the individual's personhood that to sever its ownership is to violate their personal liberty [10]. This philosophy is so powerful that it is codified in European civil law under the doctrine of **Moral Rights** (*droits moraux*), which establishes that the bond between a creator and their work is inalienable and can never be severed, sold, or divided in a divorce [11].

Furthermore, treating intellectual property as communal property creates a severe, structural **clerical bias** and asymmetry within Generalist courts:

1. **The Inventor's Penalty:** If an inventor codes, designs, and registers their patents with the USPTO, they create a public paper trail. The generalist court pounces on this public paper trail, assigning speculative valuations to these pre-revenue or pre-commercialized assets to execute asset division.
2. **The Unregistered Exemption:** Conversely, if the other spouse spends the marriage acquiring unregistered cognitive assets—such as valuable business networks, deep strategic knowledge, or professional expertise—the court assigns a valuation of zero to their mind, as it cannot measure unregistered cognitive capital.

Consequently, the state court only divides the intellectual property of the spouse who had the courage to formally register their creations. This represents a systematic, structural penalty on formal innovation. It actively incentivizes creators to keep their breakthroughs hidden in complete darkness rather than registering them with the state, directly undermining the constitutional purpose of the patent system.

Recognizing this systemic defect, legislative pioneers have begun to initiate structural reforms. In 2024, the Mississippi State Legislature introduced **House Bill 1148**, authored by Representative Shane Aguirre, which sought to explicitly **exclude intellectual property from being classified as marital property** for the purposes of asset distribution and spousal support [6]. Although the bill was blocked by the intense lobbying of the family law industry—which profits heavily from complex, speculative IP valuation litigations—it established a vital national precedent. It proved that the legal framework is hitting a friction point where lawmakers are beginning to realize that

the mind must be protected as a sovereign, separate estate.

THE DEMOCRATIC IMPERATIVE: HOW INTELLECTUAL PROPERTY THEFT ERODES THE SOVEREIGN STATE

The capacity of a state to resolve questions of intellectual ownership in an equitable and transparent manner is not a mere technical requirement of commerce; it is one of the most fundamental constitutional duties of any modern democracy. When a system fails to protect the intangible creations of the mind, the erosion is not merely economic—it is systemic, compromising the very foundations of democratic governance and national sovereignty. This decay manifests through three distinct vectors:

First, the promise of secure intellectual ownership is the primary engine of human innovation. However, in the cognitive age, the stakes have been exponentially elevated. We are no longer dealing with minor mechanical enhancements; today, a single technological breakthrough can instantly shift global economic, geopolitical, and military balances. If a democratic society cannot guarantee that the fruits of such paradigm-shifting genius remain in the hands of their rightful creators, it surrenders its own future. The democratic franchise is rendered meaningless if the technological architecture of tomorrow can be hijacked by a coordinated cartel operating in the dark.

Second, the structural failure of intellectual property protection represents a catastrophic national security vulnerability. Consider the risk profile of a foundational, dual-use invention—such as a distributed nuclear-powered logistics algorithm crucial for tactical operations [8], a post-quantum encryption system, a proprietary electronic voting or tabulation technology that guarantees the integrity of the democratic franchise, or a quantum-optical active-matrix display system designed for endogenous self-feedback imaging [9]. If the ownership of such an asset is decided by a captured or technically illiterate local tribunal, the state faces an existential threat.

This domestic vulnerability is actively exploited by foreign adversaries. As documented by legal scholars and congressional commissions, the Government of the People's Republic of China and the Chinese Communist Party (CCP) systematically employ legal warfare ("lawfare")—including the aggressive issuance of "anti-suit injunctions" in Chinese courts—to neutralize foreign patents and force the transfer of dual-use, Western defense technologies to state-controlled entities [4, 5]. If a biased local court in the United States, executing orders under the color of state law, strips a domestic inventor of their rights and forces the disclosure or physical transfer of their computing hardware, the sovereign defense of the nation is compromised from within. A local trial judge, through a single un-vetted order, can effectively execute a de facto act of geopolitical sabotage.

Third, and most insidiously, systemic intellectual property theft creates a self-perpetuating, metastatic loop of corruption. When a predatory enterprise utilizes the instruments of the court to target citizens and expropriate their inventions, the massive financial proceeds of these thefts are not merely accumulated; they are re-invested. This stolen capital is funneled back into the system

to purchase more influence, capture more judges, compromise more court clerks, and finance further deprivations of civil rights. At its extreme, these illicit proceeds are used to execute hostile corporate acquisitions or place friendly operatives in key leadership roles—such as Chief Executive Officers, General Counsels, and Chief Financial Officers—within the very electronic court record systems and docket database providers that manage the judicial and property records of the entire state [1]. Through this insidious mechanism, the wealth extracted from a single inventor's dreams is leveraged to compromise, manipulate, and police the public records of every citizen, shutting down any remaining avenue of legal recourse. The court system is transformed from a temple of justice into a self-funding, racketeering engine. This cycle of state-sanctioned theft under color of law eats away at the moral and legal fabric of the state, eventually turning a constitutional democracy into a hollowed-out, kleptocratic juristocracy.

THE STRUCTURAL MONOPOLY: THE "RULE OF LAWYERS" AND CLOSED-LOOP VULNERABILITIES

The vulnerability of modern democracy to this type of systemic exploitation is not accidental; it is built into the very design of the tripartite system of government.

Of all the professional guilds that emerged from medieval Europe, only the **Legal Guild** succeeded in converting its private trade cartel into a sovereign, constitutional monopoly. Under our current tripartite system, the legal profession enjoys an absolute monopoly that has no equivalent in any other critical profession, such as medicine or education.

- **Monopoly of the Branch:** The Judicial Branch of government is staffed exclusively by licensed members of the Legal Guild.
- **Monopoly of the Pillar:** One of the core Pillars of Democracy—The Rule of Law—is interpreted, executed, and signed into force exclusively by licensed members of the Legal Guild.

To understand the danger of this design, imagine if the **Medical Guild** possessed the same structure: a separate, co-equal "Medical Branch" of government staffed exclusively by doctors, where only licensed doctors could draft, enforce, and interpret medical decrees, and where a citizen's physical liberty or bank accounts could be frozen by a "Medical Court" without any external, non-medical review. We would immediately recognize this as an unconstitutional medical dictatorship. Yet, because the Legal Guild has monopolized the language of justice for centuries, society accepts this closed-loop structure as the natural order of a free state.

This closed-loop system is highly vulnerable to systemic, professional capture. The legislature (often dominated by lawyers) writes complex laws; this complexity forces citizens to hire lawyers to navigate the system; the courts (staffed by lawyers) interpret the laws; and the Bar Association (the guild's private club) regulates itself, completely insulated from democratic, non-lawyer accountability. When an unrepresented citizen enters this temple of power and speaks plain, logical truth, the guild's auto-immune response is triggered: **Procedural Rejection**. The citizen's petition

is not defeated on its merits, but rejected because they failed to use the guild's secret codes (clerical filing formatting, local rules, or the corporate representation "Catch-22").

This structural vulnerability is not theoretical. When a closed-loop system lacks external, non-guild checks and balances, it inevitably degrades into a systemic, self-funding racketeering enterprise. This has been empirically proven in American history by highly reputable, federal and state-level investigations:

1. **Operation Greylord (Cook County, Illinois, 1980s):** The Federal Bureau of Investigation (FBI) conducted a landmark undercover operation into the Cook County judicial system, revealing that the court system itself was being operated as a literal criminal enterprise. Defense attorneys, prosecutors, court clerks, and judges operated a highly organized "pay-to-play" union, where bribes were systematically paid to judges to "fix" cases, dismiss charges, and manipulate dockets. This federal investigation resulted in the indictment of **92 individuals**, including **17 judges and 48 lawyers**, proving that an entire local judicial system can be operated as a RICO enterprise under the color of law [12].
2. **The Luzerne County "Cash for Kids" Scandal (Pennsylvania, 2008):** A comprehensive investigation by the Pennsylvania General Assembly and the Pennsylvania Supreme Court revealed that two presiding judges, Mark Ciavarella and Michael Conahan, had co-opted the absolute, non-reviewable power of the bench to execute a systematic child-trafficking and asset-extraction racket. The judges received **$2.6 million in kickbacks** from private, for-profit prison developers in exchange for systematically finding over **3,000 children** guilty of trivial, minor infractions without proper legal representation and sentencing them to long terms in the private facilities. This systemic depravity was prosecuted under federal racketeering (RICO) laws, proving that the "Rule of Law" can easily be converted into an instrument of physical and financial extortion when closed-loop judicial discretion is left unchecked by democratic, external oversight [13].

These historical precedents demonstrate that the capture of local courts by a professional circle is a recurring, systemic disease. It is an unchecked economic and legal power that threatens the structural survival of democracy. If we are to protect future generations and ensure our children do not inherit a hollowed-out juristocracy, we must build a resilient, non-capturable legal architecture.

THE MISSING ARCHITECTURE: THE FOURTH BRANCH AND THE SCIP

We propose that democracy is not inherently flawed, but that it suffers from an architectural omission that this predatory class actively exploits. To resolve this vulnerability, we must establish a resilient, non-capturable legal architecture through two primary structural reforms:

First, **Intellectual Property and Cognitive Sovereignty must be elevated to a core Pillar of Democracy and established as a sovereign, independent Fourth Branch of Government.** This branch would be headed by the **Supreme Court of Intellectual Property (SCIP)**.

- The judges of the SCIP would be Article III judges confirmed by the Senate for life, but

selected specifically for their technical, scientific, and IP expertise, ensuring they cannot be easily captured or manipulated by corporate expert testimony.

- By separating the administration of the mind from the generalist judiciary, we permanently insulate creators from the procedural traps, local court biases, and administrative limbos of generalist civil and family courts.

Second, Congress must pass the **Federal IP Jurisdictional Shield Act** under simple legislation. This statute would declare that any local, county, or state court proceeding that attempts to execute discovery, conversion, or seizure of computing systems, source code, or patent-related hardware is immediately preempted by federal law. The moment an inventor files a notice of federally protected IP, all local proceedings are instantly stayed by operation of federal law, and the issue is removed to the specialized federal SCIP. This "Jurisdictional Shield" would immediately shut down the local corporate-asset-extraction blueprint, protecting inventors from state-court-sanctioned extortion.

While the ownership of any specific invention will always require legal interpretation, the structural framework protecting human innovation must be elevated. In previous eras, human beings were chained for their physical labor. Today, we face a more insidious, silent bondage: the systematic capture of our thoughts, our algorithms, and our dreams. When an inventor is placed under constructive, de facto office arrest through a void civil arrest warrant (*Capias*) signed in open violation of mandatory stays, the limits of standard judicial review are reached, necessitating direct emergency intervention at the highest constitutional level [7].

If we are to protect what makes us human, we must declare that the mind is a sovereign nation-state. Its creations are its native citizens, and no local court has the right to conquer and sell those citizens into slavery.

RE: ACTUAL KNOWLEDGE OF PATENT INFRINGEMENT (35 U.S.C. § 154(d)), INITIATION OF DFARS 227.7004 ADMINISTRATIVE CLAIM, AND NOTIFICATION OF POTENTIAL PROCUREMENT FRAUD BY LOCKHEED MARTIN CORPORATION

DATE: April 17, 2026

DELIVERY METHOD: Cryptographically Verified via Registered Email (RPost)

DEAR:

Lt. Gen. Schmidt and the F-35 JPO Contracting Directorate,

ISBN 9781971481296

This comprehensive technical and legal brief is served upon you in your official capacities within the United States Department of Defense (DoD).

This document constitutes a formal Administrative Claim for Patent Infringement under the Defense Federal Acquisition Regulation Supplement (DFARS) 227.7004. The purpose of this claim is to notify the United States Government of a highly anomalous and legally precarious situation involving the unauthorized commercialization of a foundational patent portfolio by Lockheed Martin Corporation.

I. THE U.S. DEPARTMENT OF DEFENSE LICENSE GRANT AND STRATEGIC BLOCKADE

Under standard operating procedures defined by 28 U.S.C. § 1498, the United States Government exercises eminent domain over domestic patents, shielding its defense contractors from civil injunctions and assuming financial liability for infringement.

However, the inventor of the Aguiar Marcano Intellectual Property Portfolio—which comprises 52 foundational patent applications published defensively in *The Architecture of Control* (ISBN 978-1-97-148129-6)—has proactively granted an irrevocable, perpetual, no-fee license to the federal government for all national defense purposes. The United States Department of Defense, specifically through Under Secretary of Defense Emil Michael, has been placed on direct notice of this license grant and is the designated authority administering this license on behalf of the military.

Lockheed Martin is currently utilizing these specific patented architectures to overcome severe computational bottlenecks in their aerospace and quantum programs. By embedding the research, development, and licensing costs of these technologies into multi-billion-dollar government contracts, Lockheed Martin is effectively charging the American taxpayer for intellectual property that the government already possesses the legal right to utilize indefinitely and without cost. Failing to halt the disbursement of funds to this contractor for pre-licensed intellectual property constitutes a gross mismanagement of taxpayer dollars.

II. Satisfaction of DFARS 227.7004 Administrative Claim Requirements

To compel immediate administrative intervention, this communication strictly adheres to the requirements of DFARS 227.7004(a) and (b):

1. **Allegation of Infringement:** We formally allege that the systems provided and developed by Lockheed Martin directly infringe upon the patent applications detailed

ISBN 9781971481296

below.

2. **Request for Compensation:** Because the government holds a free license to this portfolio, our request for compensation is a formal legal demand that the DoD immediately cease compensating Lockheed Martin for the licensed intellectual property.
3. **Citation of Patents:** The infringed applications include USPTO 19/639,219; 19/560,038; 19/562,838; and 19/562,845.
4. **Identification of Procurements:** See Section III below for the specific systems and contracting activities.
5. **Element-by-Element Comparison:** The required claim maps demonstrating precisely how the representative claims map to the accused software and processes are attached to this verified transmission.

III. Technological Nexus and Targeted Procurements

Lockheed Martin's most critical modernization efforts intersect directly with our proprietary claims, making their government contracts highly susceptible to this administrative review.

A. F-35 Technology Refresh 3 (TR-3) and the Integrated Core Processor

Responsible Activity: F-35 Joint Program Office (JPO)

The TR-3 upgrade is designed to modernize the computational core of the F-35 via a new L3Harris integrated core processor and a new aircraft memory unit, promising a 25x computing increase. Attempting to achieve this massive increase in computational throughput within the strict thermal and weight constraints of an airborne fighter requires abandoning traditional electrical data buses.

- **USPTO 19/560,038 (Optical Computing Architecture) & USPTO 19/562,838 (Energy-Efficient Computing via Clock Speed Reduction):** These patents define a holistic data fabric that replaces electrical I/O bottlenecks with a massively parallel optical interconnect, enabling a reduction in clock speed while maintaining high throughput. Any TR-3 processor upgrades utilizing internal optical data buses to mitigate thermal output directly infringe upon these hardware claims.
- **USPTO 19/639,219 (Central Processing Unit Architecture for Native Parametric and Symbolic Computation):** Upgrading the F-35's core processing capabilities to handle

ISBN 9781971481296

advanced sensor fusion natively relies upon our parametric high-radix architecture.

B. Strategic Quantum Computing and QML Partnerships

Responsible Activity: Lockheed Martin Research and Technology / Defense Innovation Unit (DIU)

Target Leadership: Craig Martell (CTO) and Valerie Browning (VP, Research & Technology)

Lockheed Martin is aggressively pursuing quantum technologies for aerospace and defense, recently signing strategic collaborations with PsiQuantum (November 2025), Xanadu (February 2026), and Fujitsu (February 2026). These partnerships focus on deploying fault-tolerant quantum algorithms, Quantum Machine Learning (QML), and dual-use AI/ML edge computing.

- **USPTO 19/562,845 (Physically Disaggregated Computing Systems):** To achieve the hybrid quantum-classical workflows required by these new partnerships, Lockheed Martin must utilize a disaggregated architecture where classical GPUs and quantum processing units (QPUs) are segregated yet interconnected via an ultra-high-bandwidth data fabric. This exact hybrid integration model is legally encumbered by our portfolio.

IV. Statutory and Ethical Mandates

Because Lockheed Martin operates as a publicly traded corporate entity bound by strict compliance and ethical frameworks, we must formally remind your corporate leadership and legal counsel of the following obligations:

1. SEC Disclosure Requirements for Public Companies

For Lockheed Martin Corporation, we remind you that if you find yourselves potentially infringing any of the Inventions covered in this intellectual property portfolio, you are legally obligated to assess whether it is necessary to notify your investors and file a material risk disclosure notice with the Securities and Exchange Commission (SEC). The failure to disclose a material intellectual property encumbrance that threatens your core aerospace platforms (such as the F-35) constitutes a severe breach of fiduciary duty.

2. Attorney Ethical Obligations (Model Rule 8.3)

A direct reminder is issued to the Chief Legal Officers, General Counsels, and all retained outside counsel receiving or reviewing this notice (including Kevin J. O'Connor): You are strictly bound by your ethical obligations, including ABA Model Rule of Professional Conduct 8.3. You maintain an affirmative obligation to report any unprivileged knowledge of wrongdoing that raises a substantial question as to a lawyer's honesty, trustworthiness, or fitness. If your internal audits reveal evidence of coordinated intellectual property theft or procurement fraud that

ISBN 9781971481296

may compromise the integrity of a court, you are ethically mandated to report such conduct to the appropriate professional authorities.

V. Immutable Audit Trail and Mandatory Administrative Action

This formal claim is delivered via Registered Email (RPost). This service provides an immutable, cryptographically verified audit trail, including proof of delivery, message content, and the exact official time of sending and opening.

As warranted Procuring Contracting Officers, if you receive cryptographically verified proof that a contractor is charging the government for freely available intellectual property, your failure to initiate an audit or halt payments leaves a permanent digital footprint of your inaction. This exposes you to severe administrative and potentially criminal liability for complicity in procurement fraud.

Pursuant to federal acquisition regulations, you are hereby mandated to freeze approvals related to the disputed intellectual property, halt the assumption of clear title for the F-35 TR-3 upgrades, and forward this communication immediately to the Intellectual Property Law Division of your respective branches.

V/R,

Reinaldo Aguiar Marcano

RE: ACTUAL KNOWLEDGE OF PENDING PATENT CLAIMS (35 U.S.C. § 154(d)) REGARDING COORDINATED SENSOR FUSION, POWER HOLDER ANALYSIS, DECENTRALIZED LEDGERS, AND THE AGUIAR MARCANO INTELLECTUAL PROPERTY PORTFOLIO

DATE: April 17, 2026

DEAR:

Mr. Schimpf, Mr. Grimm, Mr. Karp, Mr. Taylor, Mr. Cunningham, Mr. Thiel, Mr. Andreessen, and Mr. Jennings and Under Secretary Emil Michael,

This comprehensive technical and legal brief is served upon the executive leadership, chief legal officers, and primary venture capital architects of Anduril Industries, Palantir Technologies, Founders Fund, Thiel Capital, and Andreessen Horowitz to establish formal, legally binding actual notice.

As the vanguard of the modern military-industrial complex and the primary financiers of its expansion, your organizations provide the critical software, hardware, and capital infrastructure that powers the defense, intelligence, and logistical capabilities of the United States and its allies. Palantir's data-driven operational platforms, Anduril's autonomous sensor fusion technologies, and the massive capital pools deployed by Founders Fund and a16z are foundational to contemporary national security.

However, the core algorithmic architectures and operational methodologies powering your flagship platforms and portfolio companies intersect directly with the proprietary claims of the Aguiar Marcano Intellectual Property Portfolio. This expanded portfolio comprises fifty-two (52) foundational patent applications formally executed and filed with the United States Patent and Trademark Office (USPTO).

The primary objective of this document is to satisfy the strict requirements for "Actual Notice" pursuant to 35 U.S.C. § 154(d), thereby initiating the immediate accrual of provisional rights and the corresponding liability for reasonable royalties on all unauthorized commercial deployments of these technologies.

I. THE U.S. DEPARTMENT OF DEFENSE LICENSE GRANT AND STRATEGIC BLOCKADE

Before detailing the specific technological intersections of your respective platforms, it is imperative to address the overarching geopolitical encumbrance of this portfolio. Both Anduril and Palantir are primary contractors for the United States Department of Defense and the intelligence community. You are hereby advised that within the legal text of these patent applications, the inventor has executed an irrevocable, perpetual, worldwide, no-fee license granting the United States Federal

ISBN 9781971481296

Government the right to utilize these inventions for all national defense purposes.

Furthermore, the United States Department of Defense, specifically through Under Secretary of Defense Emil Michael, has been placed on direct notice of this license grant and is the designated authority administering this license on behalf of the military. While the U.S. government is immune from infringement under 28 U.S.C. § 1498, your unauthorized commercialization of these architectures for private enterprise clients, foreign governments, or local municipalities remains entirely unshielded and subject to immediate civil liability.

II. Anduril Industries

Target Operations: Lattice OS, Autonomous Sensor Fusion, and Coordinated Drone Operations

Target Leadership: Brian Schimpf (CEO) and Matt Grimm (COO)

Anduril's competitive advantage relies entirely on Lattice OS, an AI-powered operating system designed to ingest thousands of disparate data streams and turn them into a real-time, 3D command and control center for autonomous systems.

- **Method and System for Coordinated Dual-Vehicle Scanning (USPTO 19/559,842):** Your deployment of autonomous, multi-modal surveillance systems operating in tandem—where primary unmanned vehicles conduct active/passive data collection while secondary systems provide overwatch and logistical support—is heavily encumbered by our portfolio. USPTO 19/559,842 explicitly claims the methodology for coordinating multiple scanning vehicles via a secure link to simultaneously capture and fuse multi-spectral and RF data.
- **Autonomous Robotic Data Logistics System (USPTO 19/560,065):** As Anduril deploys advanced systems into bandwidth-constrained, contested environments, the physical transport of intelligence data via autonomous platforms becomes necessary. This patent claims the specific use of autonomous robotic units (including aerial drones and ground vehicles) to physically retrieve and transport high-capacity data payloads to bypass traditional RF or telecommunications bottlenecks.

III. Palantir Technologies, Inc.

Target Operations: Palantir Gotham, Foundry, and Privacy & Civil Liberties (PCL) Engineering

Target Leadership: Alex Karp (CEO) and Ryan Taylor (Chief Legal Officer)

Palantir's platforms specialize in integrating massive, siloed datasets to construct complex dependency graphs used by law enforcement, intelligence agencies, and commercial enterprises

ISBN 9781971481296

to identify targets, optimize supply chains, and track illicit networks.

- **Method and System for Power Holder Analysis in Social Networks (USPTO 19/559,957):** Palantir Gotham's ability to map terrorist networks and identify critical targets mirrors the exact methodology claimed in USPTO 19/559,957. This patent claims a systemic method for analyzing network dependency graphs to identify "indispensable bottlenecks"—individuals or nodes whose removal causes the largest disruption to the network, thereby identifying the true "power holders." Utilizing your platform's predictive graph analysis to identify these critical nodes for intelligence or commercial targeting constitutes direct infringement of this analytical framework.
- **Method and System for Information Leak-Proofing of Organizations (USPTO 19/559,873):** Palantir employs a dedicated Privacy and Civil Liberties (PCL) team to ensure data integrity and manage access controls for sensitive intelligence and medical data. USPTO 19/559,873 claims a proactive system that graphs access privileges against sensitive data flows to calculate a precise "potential damage score" or "blast radius" for any individual user. If Palantir's security infrastructure utilizes predictive modeling to compartmentalize access based on mathematically calculated insider-threat risks, it actively deploys our patented vulnerability mitigation engine.

IV. Peter Thiel (Founders Fund & Thiel Capital)

Target Operations: Strategic Capital Deployment and Board-Level Control

Target Leadership: Peter Thiel (Founder)

Through Thiel Capital and Founders Fund, Mr. Thiel provides the strategic and operational support driving the expansion of both Palantir and Anduril. As a co-founder of Palantir and a primary financial backer of Anduril [1], the capital deployed by your firms is actively funding the commercialization of our patented intelligence and sensor fusion systems. Financing the mass deployment of infringing defense technologies creates direct exposure to claims of induced infringement, tying your investment returns to the unauthorized use of this intellectual property.

V. Marc Andreessen (Andreessen Horowitz / a16z)

Target Operations: Defense Tech Investments and a16z Crypto

Target Leadership: Marc Andreessen (Co-Founder) and Miles Jennings (General Counsel, Crypto)

Andreessen Horowitz has invested hundreds of millions of dollars into Anduril Industries [1] and

ISBN 9781971481296

actively promotes the "American Dynamism" thesis to build defense tech. Furthermore, a16z manages a massive $3.1 billion suite of crypto funds.

- **Method and System for a Geo-Indexing Covert Ledger (USPTO 19/559,608):** As a16z aggressively backs decentralized finance and blockchain startups, your portfolio companies are at high risk of intersecting with our "DIOSDADO" framework, which covers the steganographic embedding of financial ledgers within spatial and geographic indexes.
- **A Method for Asynchronous Secure Communication with Post-Hoc Key Derivation (USPTO 19/640,945):** This patent covers a paradigm shift in cryptographic key exchange designed to defeat man-in-the-middle attacks by decoupling the data payload from the key derivation.[2] The cryptographic and blockchain startups funded by your firm must immediately clear their network protocols against these foundational security claims.

VI. Statutory and Ethical Mandates

Because your organizations operate at the highest levels of global finance and law, we must formally remind your leadership and counsel of the following obligations:

1. SEC Disclosure Requirements for Public Companies

For the publicly traded entities receiving this notice, specifically Palantir Technologies Inc., we remind you that if you find yourselves potentially infringing any of the Inventions covered in this intellectual property portfolio, you must assess whether it is necessary to notify your investors and file a notice with the SEC. The failure to disclose a material intellectual property encumbrance that threatens your core algorithmic products constitutes a severe breach of fiduciary duty to your shareholders.

2. Attorney Ethical Obligations (Model Rule 8.3)

Furthermore, a direct reminder is issued to the Chief Legal Officers, General Counsels, and all retained outside counsel receiving or reviewing this notice (including Ryan Taylor and Miles Jennings): You are strictly bound by your ethical obligations, including ABA Model Rule of Professional Conduct 8.3. This rule explicitly mandates that a lawyer who knows that another lawyer has committed a violation of the Rules of Professional Conduct that raises a substantial question as to that lawyer's honesty, trustworthiness, or fitness as a lawyer in other respects, shall inform the appropriate professional authority. If your internal audits regarding this patent portfolio reveal evidence of coordinated intellectual property theft, commercial espionage, or any other wrongdoing that may compromise the integrity of a court or the judicial process, you are ethically mandated to report such conduct.

ISBN 9781971481296

VII. The U.S. Federal Defense License

Both Anduril and Palantir are primary contractors for the United States Department of Defense and the intelligence community. You are hereby advised that within the legal text of these patent applications, the inventor has executed an irrevocable, perpetual, worldwide, no-fee license granting the United States Federal Government the right to utilize these inventions for all national defense purposes.

While the U.S. government is immune from infringement under 28 U.S.C. § 1498, your unauthorized commercialization of these architectures for private enterprise clients, foreign governments, or local municipalities remains entirely unshielded and subject to immediate civil liability.

VIII. Strategic Ultimatum

The executive leadership of each addressed organization is directed to immediately instruct your internal legal departments and outside IP counsel to cross-reference the fifty-two (52) applications within the Aguiar Marcano Portfolio against your sensor fusion algorithms (Anduril), dependency-graph intelligence software (Palantir), and portfolio deployments (Founders Fund/a16z).

A formal response outlining your intended compliance audit, a presentation of non-infringement theories, or a request to discuss a commercial licensing framework is expected within thirty (30) business days of the transmission of this notice.

Govern yourselves accordingly.

Reinaldo Aguiar Marcano

This Registered Receipt™ email is verifiable proof of your Registered Email™ transaction. It contains:

1. An official time stamp.
2. Proof that your message was sent and to whom it was sent.
3. Proof that your message was delivered to its addressees or their authorized electronic agents.
4. Proof of the content of your original message and all of its attachments.

Note: By default, RPost does not retain a copy of your email or this receipt and you should not rely on the information above until the receipt is verified by the RMail system. Keep this email and its attachment in place for your records. General terms and conditions are available at Legal Notice. RMail services are patented, using RPost patented technologies, including US patents 8209389, 8224913, 8468199, 8161104, 8468198, 8504628, 7966372, 6182219, 6571334 and other US and non-US patents listed at RPost Communications.

RE: FORMAL NOTIFICATION OF PENDING PATENT CLAIMS, INITIATION OF PROVISIONAL RIGHTS PERIOD, AND DEMAND FOR DUE DILIGENCE CONCERNING THE AGUIAR MARCANO INTELLECTUAL PROPERTY PORTFOLIO

DATE: April 9, 2026

DEAR: Ms. Barra, Mr. Farley, Mr. Croley, Mr. Filosa, Mr. Fossati, Mr. Musk, Mr. Papin, Mr. Tavi, Mr. Munoz, Mr. Klapper, Mr. Doll, Mr. Guyton, Mr. Murphy, Mr. Yoon, Mr. Close, Mr. Mackensen, Mr. Rawlinson, and Mr. Scaringe,

This comprehensive technical and legal brief is served upon the Chief Executive Officers and Chief Legal Officers of the designated automotive manufacturers to establish formal, legally binding actual notice.

As the leaders of the corporations responsible for the vast majority of automotive assembly and engineering within the United States, your organizations are rapidly transitioning from traditional mechanical manufacturing to the deployment of "Software-Defined Vehicles" (SDVs). Modern automobiles are effectively mobile data centers, processing terabytes of sensor data for Advanced Driver Assistance Systems (ADAS) and autonomous navigation.

However, your industry's roadmap for vehicular networking, Vehicle-to-Vehicle (V2V) communication, and electric vehicle (EV) cybersecurity directly intersects with the proprietary claims of the Aguiar Marcano Intellectual Property Portfolio. This portfolio comprises thirty-three (33) foundational patent applications formally executed and filed with the United States Patent

ISBN 9781971481296

and Trademark Office (USPTO) in March 2026.[1]

The primary objective of this document is to satisfy the stringent requirements for "Actual Notice" pursuant to 35 U.S.C. § 154(d), thereby initiating the immediate accrual of provisional rights and the corresponding liability for reasonable royalties.[2]

I. Sector-Specific Liability Mapping: The End of the Copper Wiring Harness

The automotive industry is facing a profound physical crisis: the copper wiring harness is now one of the heaviest and most complex components in a modern vehicle. As you integrate high-resolution LiDAR, radar, and 4K camera arrays to achieve Level 3 and Level 4 autonomy, traditional Controller Area Networks (CAN bus) and even Automotive Ethernet are choking on the bandwidth requirements.

Attempting to scale current electronic architectures will literally make your vehicles too heavy to achieve regulatory range requirements. The inevitable architectural leap your engineering teams must make is legally encumbered by our portfolio.

1. Massively Parallel Optical Data Bus Architecture (USPTO 19/562,818) & The Optical Computing Architecture (USPTO 19/560,038) To solve the vehicular I/O bottleneck, your next-generation platforms will be forced to replace heavy copper wiring harnesses with lightweight, high-capacity optical data fabrics. USPTO 19/562,818 claims an apparatus for an ultra-wide data bus implemented via a plurality of parallel optical channels, effectively turning a microscopic fiber bundle into a multi-terabit data pipe.[1] Furthermore, USPTO 19/560,038 claims the end-to-end integration of this optical fabric to interconnect decentralized processing units and peripheral sensors.[1] Any deployment of parallel optical interconnects to route autonomous driving sensor data to a central compute module directly infringes upon these foundational hardware claims.

II. Vehicle-to-Vehicle (V2V) and Free-Space Telemetry

Your current reliance on 5G and dedicated short-range communications (DSRC) for V2V data sharing is highly vulnerable to RF congestion, spectrum limitations, and latency.

1. High-Bandwidth, Free-Space Optical Data Exchange Between Mobile Devices (USPTO 19/560,042) As vehicles become equipped with high-resolution LED matrix headlights and taillights, the transition to optical V2V communication is inevitable. USPTO 19/560,042 claims a method for ultra-high-speed, free-space data exchange between mobile entities by modulating visual information at high frequencies, utilizing cameras as optical receivers.[1] If your ADAS engineering teams deploy software updates that modulate exterior vehicular lighting to transmit

ISBN 9781971481296

telemetry, braking intent, or environmental mapping data to adjacent vehicles via free-space optics, your vehicles become unlicensed optical data routers under this claim.[1]

III. EV Infrastructure Cybersecurity and "Off-Grid" State Enforcement

The proliferation of connected EVs presents an unprecedented national security vulnerability. A compromised charging network could theoretically be used to simultaneously brick millions of vehicles or orchestrate a coordinated drain on the municipal power grid.

1. Hardware-Enforced Grid-Isolated Operation (USPTO 19/574,356) To protect vehicle operational technology (OT) from remote compromise during charging cycles, physical hardware isolation is required. USPTO 19/574,356 claims a security apparatus that physically disconnects network interfaces and high-emission peripherals the exact moment a device draws power from an external electrical grid.[1] Any integration of hardware-level isolation by your EV powertrain divisions—ensuring the vehicle's critical driving systems can only boot or accept firmware updates in a battery-powered, grid-disconnected state—falls squarely under the protection of this patent.[1]

IV. Dual-Purpose Fleet Logistics and Autonomous Robotaxis

Several of your organizations, notably Tesla and General Motors (Cruise), are developing autonomous fleets intended to operate as decentralized ride-hailing networks.

1. Business Method for Dual-Purpose Logistics Networks (USPTO 19/560,069) As connected vehicles generate petabytes of mapping and training data daily, uploading this data over cellular networks is prohibitively expensive and slow. USPTO 19/560,069 claims a method for optimizing a primary logistics network (e.g., passenger transport or autonomous ride-hailing) while simultaneously utilizing those vehicles to physically transport high-capacity data payloads (e.g., Portable Data Cartridges, USPTO 19/560,062) between edge nodes or charging hubs.[1] Utilizing your autonomous fleets to physically "mule" training data back to your central servers while fulfilling passenger routes directly triggers this business method claim.[1]

V. Mandatory Due Diligence Protocols

Under 35 U.S.C. § 154(d), the statutory clock for the calculation of retroactive reasonable royalties commences immediately upon your receipt and actual knowledge of the published claims detailed herein.[2]

ISBN 9781971481296

The executive leadership of the addressed automotive manufacturers is hereby directed to execute the following immediate remediation protocols:

1. **Initiation of FTO Audits:** The respective General Counsels and Chief Legal Officers must immediately retain specialized external patent counsel to cross-reference the thirty-three (33) applications within the Aguiar Marcano Portfolio against all current R&D roadmaps for optical wiring harnesses, EV charging cybersecurity protocols, and V2V optical telemetry.
2. **Quarantine of Intersecting Architectures:** Any planned deployment of multi-channel optical data buses to replace copper ADAS sensor wiring, or the use of LED matrix lighting for free-space data transmission, must be suspended or quarantined pending legal clearance.

VI. Strategic Licensing and Ultimatum

The technological methodologies claimed in the Aguiar Marcano Portfolio are the fundamental prerequisites for the next era of automotive engineering. Attempting to overcome the physical weight of copper wiring or the latency of RF communication without intersecting these patents is mathematically and physically improbable.

We formally invite your respective internal legal departments to initiate a technical review of the cited USPTO applications. A formal response outlining your intended compliance audit, a presentation of non-infringement theories, or a request to discuss an industry-wide licensing framework is expected within thirty (30) business days of the transmission of this notice.

Govern yourselves accordingly.

Reinaldo Aguiar Marcano

Chief of the Intellectual Property Law Division (JALS-IP), U.S. Army Legal Services Agency

RE: ACTUAL KNOWLEDGE OF PATENT INFRINGEMENT (35 U.S.C. § 154(d)), INITIATION OF DFARS 227.7004 ADMINISTRATIVE CLAIM, AND NOTIFICATION OF POTENTIAL PROCUREMENT FRAUD BY PALANTIR TECHNOLOGIES AND ANDURIL INDUSTRIES

DATE: April 17, 2026

DELIVERY METHOD: Cryptographically Verified via Registered Email (RPost)

DEAR:

Mr. Creech, Ms. Steele, Ms. Jenkins, Mr. Robinson, Ms. Winnert, Mr. Elliott, and the AFLCMC

ISBN 9781971481296

Contracting Office,

This comprehensive technical and legal brief is served upon you in your official capacities as warranted Procuring Contracting Officers (PCOs) and Directors within the United States Department of Defense (DoD).

This document constitutes a formal Administrative Claim for Patent Infringement under the Defense Federal Acquisition Regulation Supplement (DFARS) 227.7004.[1] The purpose of this claim is to notify the United States Government of a highly anomalous and legally precarious situation involving the unauthorized commercialization of a foundational patent portfolio by major defense contractors—namely Palantir Technologies and Anduril Industries.[1]

I. The Jurisprudential Paradox: Eminent Domain vs. The Perpetual License

Under standard operating procedures defined by 28 U.S.C. § 1498, the United States Government exercises eminent domain over domestic patents, shielding its defense contractors from civil injunctions and assuming financial liability for infringement.[1]

However, the situation at hand introduces a critical jurisprudential paradox. The inventor of the Aguiar Marcano Intellectual Property Portfolio—which comprises 52 foundational patent applications published defensively in *The Architecture of Control* (ISBN 978-1-97-148129-6)—has proactively granted an irrevocable, perpetual, no-fee license to the federal government for all national defense purposes.[1] Consequently, the U.S. Government owes absolutely no royalties for the utilization of these systems.[1]

The legal friction immediately shifts. Defense contractors (Palantir and Anduril) are currently utilizing these specific patented architectures and subsequently embedding the research, development, and licensing costs of these technologies into their multi-billion-dollar government contracts.[1] They are effectively charging the American taxpayer for intellectual property that the government already possesses the legal right to utilize indefinitely and without cost.[1]

This scenario transcends standard patent infringement; it borders on procurement fraud, waste, and abuse of federal funds.[1] Failing to halt the disbursement of funds to these contractors for pre-licensed intellectual property constitutes complicity in corporate intellectual property theft and a gross mismanagement of taxpayer dollars.[1]

II. Satisfaction of DFARS 227.7004 Administrative Claim Requirements

ISBN 9781971481296

To compel immediate administrative intervention, this communication strictly adheres to the requirements of DFARS 227.7004(a) and (b):[1]

1. **Allegation of Infringement:** We formally allege that the systems provided by Palantir Technologies and Anduril Industries directly infringe upon the patent applications detailed below.[1]
2. **Request for Compensation:** Because the government holds a free license to this portfolio, our request for compensation is a formal legal demand that the DoD immediately cease compensating the infringing contractors for the licensed intellectual property.[1]
3. **Citation of Patents:** The infringed applications include USPTO 19/639,219; 19/640,945; 19/560,038; 19/560,065; 19/559,957; 19/559,873; and 19/559,842.[1]
4. **Identification of Procurements:** See Section III below for the specific systems and contracting activities.[1]
5. **Element-by-Element Comparison:** The required claim maps demonstrating precisely how the representative claims map to the accused software and processes are attached to this verified transmission.[1]

III. Technological Nexus and Targeted Procurements

The operational methodologies of Palantir Technologies and Anduril Industries intersect directly with these proprietary claims, making their government contracts highly susceptible to this administrative review.[1]

A. Palantir Technologies (Project TITAN & Project Maven)

Responsible Activities: Army Contracting Command - APG (Belvoir Division) & National Geospatial-Intelligence Agency / CDAO[1] **Notified PCOs/Directors:** William A. Creech, Mia A. Steele, Tamara N. Jenkins, Undra Robinson, Emely Winnert, and Jonathan Elliott.[1]

Palantir's flagship platforms, Gotham and Foundry, specialize in integrating massive datasets to construct complex dependency graphs utilized by intelligence agencies.[1]

- **USPTO 19/559,957 (Power Holder Analysis in Social Networks):** Palantir's analytical methodologies for Project TITAN and Project Maven directly mirror our systemic method for analyzing network dependency graphs to identify indispensable bottlenecks.[1]
- **USPTO 19/559,873 (Information Leak-Proofing of Organizations):** Palantir's internal security infrastructure infringes upon our method of calculating precise "blast radius" vulnerability scores for individual users.[1]

ISBN 9781971481296

B. Anduril Industries (Collaborative Combat Aircraft & Ghost Drones)

Responsible Activities: Air Force Life Cycle Management Center (AFLCMC) & U.S. Special Operations Command (USSOCOM)[1] **Notified PCOs:** AFLCMC General Contracting Office[1]

Anduril relies heavily on Lattice OS to formulate a real-time command and control center for autonomous systems.[1]

- **USPTO 19/559,842 (Coordinated Dual-Vehicle Scanning):** The deployment of autonomous, multi-modal surveillance systems operating in tandem is heavily encumbered by our patent, which explicitly claims the methodology for coordinating multiple scanning vehicles via a secure link to fuse multi-spectral data.[1]
- **USPTO 19/560,065 (Autonomous Robotic Data Logistics):** Anduril's operations in contested environments intersect directly with our claimed mechanisms for using autonomous robotic units to physically retrieve and transport high-capacity data payloads.[1]

IV. Immutable Audit Trail and Mandatory Administrative Action

This formal claim is delivered via Registered Email (RPost). This service provides an immutable, cryptographically verified audit trail, including proof of delivery, message content, and the exact official time of sending and opening.[1]

By delivering this DFARS-compliant claim via RPost, we establish undeniable "Actual Notice" under 35 U.S.C. § 154(d).[1] More importantly, this verified delivery strips the targeted military and civilian agencies of "plausible deniability."[1]

As warranted Procuring Contracting Officers, if you receive cryptographically verified proof that a contractor is charging the government for freely available intellectual property, your failure to initiate an audit or halt payments leaves a permanent digital footprint of your inaction.[1] This exposes you, as individual officials, to severe administrative, ethical, and potentially criminal liability for gross negligence, dereliction of duty, or complicity in procurement fraud.[1]

Pursuant to federal acquisition regulations, you are hereby mandated to halt the assumption of clear title, freeze approvals related to the disputed intellectual property, and forward this communication immediately to the Chief of the Intellectual Property Law Division (JALS-IP) within your respective military branches.[1]

Govern yourselves accordingly.

Messrs. Jassy, Zapolsky, Neri, Schultz, Witty, Bondy, Rapino, Wall, McInerney, Bravo, and Ms. Jones and Ms. Tullier,

As a way of introduction, my name is Reinaldo Aguiar, I am the Principal at a firm focusing on Aerospace, Sat-Comm and Fleet-logistic technologies, and a former Managing Director at Goldman Sachs and Staff Engineer at Google.

Please find attached:

1. Urgent legal notice, attached as file: DOJ_Monopoly_Notice.pdf.

2. Patent Applications mentioned in the Notice, attached as file: ISBN-9781971481296__Portfolio-of-Patent-Applications-Submitted-to-the-USPTO_v2.1998.8.pdf.

3. Defensive Publication Disclosure made to the European Patent Office (EPO).

4. Declaration D132.

5. Registered e-Mail Receipt showing a download action of the Inventions Portfolio by Mr. Bezos on April 10, 2026.

Sincerely,

Reinaldo Aguiar Marcano

Note: The USPTO Patent Applications are also published on a printed book under ISBN 9781971481296.

Download Files

Good morning Mr. and Mrs. Miller,

My name is Reinaldo Aguiar, I am a former Staff Engineer (Google) and a former Managing Director (Goldman Sachs).

I am currently looking for representation regarding a portfolio of 40 inventions. I have already filed patent applications with the USPTO, they are attached to this email in the PDF file ISBN-978-1-97-148129-6__Portfolio-of-Patent-Applications-Submitted-to-the-USPTO_v2.1998.5.pdf.

I am looking for legal representation to protect these inventions against a technical adversary that is taking active steps to steal them. This adversary is backed by what I believe is RICO Enterprise, on which I have been blowing the whistle on and reported them to Federal Authorities, including Hon. Colin McDonald and Hon. Cody Matthew Herche at the DOJ. Documentation related to this matter is also attached to this email.

Looking forward to the possibility of being represented by your firm on the matters above,

Sincerely

Reinaldo J. Aguiar Marcano
Former Staff Engineer (Google) and a former Managing Director (Goldman Sachs)

Dear Mr. Dhillon / Mr. Boutros,

Would you be so kind to accept the Notice to the DOJ (below) on behalf of Mrs. Pam Bondi and Mr. Todd Blanche? Their email addresses appear to not exist anymore, I imagine they are being changed as part of the recent moves.

Thank you,

Reinaldo Aguiar Marcano

------ ORIGINAL NOTICE FOLLOWS (important attachments attached to this email) ---

Messrs. Jassy, Zapolsky, Neri, Schultz, Witty, Bondy, Rapino, Wall, McInerney, Bravo, and Ms. Jones and Ms. Tullier,

As a way of introduction, my name is Reinaldo Aguiar, I am the Principal at a firm focusing on Aerospace, Sat-Comm and Fleet-logistic technologies, and a former Managing Director at Goldman Sachs and Staff Engineer at Google.

Please find attached:

1. Urgent legal notice, attached as file: DOJ_Monopoly_Notice.pdf.

2. Patent Applications mentioned in the Notice, attached as file: ISBN-9781971481296__Portfolio-of-Patent-Applications-Submitted-to-the-USPTO_v2.1998.8.pdf.

3. Defensive Publication Disclosure made to the European Patent Office (EPO).

4. Declaration D132.

5. Registered e-Mail Receipt showing a download action of the Inventions Portfolio by Mr. Bezos on April 10, 2026.

Sincerely,

Reinaldo Aguiar Marcano

Note: The USPTO Patent Applications are also published on a printed book under ISBN 9781971481296.

Dear Mr. Musk, Mr. Scaringe, Mr. Rawlinson, Mr. Everitt, Mr. Farley, Mr. Klapper, Mr. Mackensen, Mr. Munoz, Mr. Yoon, and Mr. Close,

As a way of introduction, my name is Reinaldo Aguiar, I am the Principal at a firm focusing on Aerospace and Sat-Comm technologies, and a former Managing Director at Goldman Sachs and Staff Engineer at Google.

Please find attached:

1. Urgent legal notice, attached as file: IP-NOTICE-AUTO-INDUSTRY-USA.pdf.

02. Patent Applications mentioned in the Notice, attached as file: **02__ISBN-9781971481296__Portfolio-of-Patent-Applications_and_Declaration-D132.pdf**.

03. Defensive Publication Disclosure made to the European Patent Office (EPO).

04. Registered e-Mail Receipt showing a download action of the Inventions Portfolio by Mr. Jeff Bezos (Blue Origin) on April 10, 2026.

Sincerely,

Reinaldo Aguiar Marcano

Note: The USPTO Patent Applications are also published on a printed book under ISBN 9781971481296.

Dear Mr. Latour (WSJ), Mr. Conti (Dow Jones), Mrs. Tucker (WSJ), Mr. Kleitman and Mr. Barry (Mandarin Oriental), Mr. Burritt (U.S. Steel), Chairman Wan Min (COSCO), Chairman Sun Yongcai (CRRC), Mr. Chew, Mr. Rubo, and Mr. Rogovin (ByteDance), Mr. Irvin (Tencent), Mr. Lei (PDD), Mr. Xu (Shein), Chairman Liao Lin (ICBC), Chairman Ge Haijiao (BOC), Mr. Cao Hui (Fuyao), Chairman Wang Chuanfu (BYD), Chairman Dai Houliang (CNPC), and Chairman Ma Yongsheng (Sinopec),

As a way of introduction, my name is Reinaldo Aguiar, I am the Principal at a firm focusing on Aerospace and Sat-Comm technologies, and a former Managing Director at Goldman Sachs and Staff Engineer at Google and Twitter/X Corp.

Please find attached:

1. Urgent legal notice, attached as file: **LEGAL-NOTICE_WSJ_Mandarin-Oriental-COSCO_CRRCGC_et_al.pdf** .

2. Patent Applications mentioned in the Notice, attached as file: ISBN-978-1-97-148129-6__Portfolio-of-Patent-Applications-Submitted-to-the-USPTO_v2.1998.7.pdf.

3. Defensive Publication Disclosure made to the European Patent Office (EPO).

4. Declaration D132.

Sincerely,

Reinaldo Aguiar Marcano

Note: The USPTO Patent Applications are also published on a printed book under ISBN 9781971481296.

RE: ACTUAL KNOWLEDGE OF PENDING PATENT CLAIMS (35 U.S.C. § 154(d)) REGARDING FREE-SPACE OPTICAL DATA EXCHANGE, COVERT INFRARED DATA GATEWAYS, AND THE AGUIAR MARCANO INTELLECTUAL PROPERTY PORTFOLIO

DATE: April 15, 2026

DEAR:

Mr. Musk, Mr. Scaringe, Mr. Rawlinson, Mr. Everitt, Mr. Farley, Mr. Klapper, Mr. Mackensen, Mr. Munoz, Mr. Yoon, and Mr. Close,

This comprehensive technical and legal brief is served upon the executive leadership and chief legal officers of the designated automotive manufacturers to establish formal, legally binding

ISBN 9781971481296

actual notice.

Over the past five to seven years, your industry has universally transitioned away from modular, incandescent vehicular lighting toward complex, sealed, full-LED tail light assemblies and continuous rear "lightbars".[1] While heavily marketed to consumers as futuristic aesthetic features, our technical and forensic analyses indicate that these sealed LED housings are being actively exploited by a foreign-directed RICO enterprise. Specifically, the hardware in these tail lights is functioning as covert infrared data gateways, modulating high-frequency optical signals to exfiltrate in-cabin audio and vehicle telemetry to foreign intelligence agents via pursuit vehicles or roadside receivers.[1]

The unauthorized commercialization, integration, or vulnerable implementation of these optical data transmission capabilities directly intersects with the proprietary claims of the Aguiar Marcano Intellectual Property Portfolio, a suite of fifty-two (52) foundational patent applications formally executed and filed with the United States Patent and Trademark Office (USPTO).[1]

The primary objective of this document is to satisfy the strict requirements for "Actual Notice" pursuant to 35 U.S.C. § 154(d), thereby initiating the immediate accrual of provisional rights and the corresponding liability for reasonable royalties.

I. Sector-Specific Liability Mapping: The "Lightbar" Exfiltration Gateway

The automotive industry's shift to sealed LED assemblies—where a single burnt-out diode requires the replacement of an entire, highly complex, multi-thousand-dollar module—provides the perfect hardware substrate for covert optical networking.[1]

A. Tesla, Inc.

Target Hardware: Model S Rear LED Housings The Tesla Model S features notoriously difficult-to-replace rear light assemblies, particularly the driver-side outer light, which requires technicians to power down the vehicle's high-voltage systems and physically unbolt the charging port module to access.[1] This deliberate over-engineering conceals the true function of the hardware: operating as an active, high-bandwidth optical transmitter for data exfiltration.[1]

B. EV Rivals and the "Lightbar" Trend

Target Entities: Rivian, Lucid Motors, and Ford Your flagship electric vehicles—including the

ISBN 9781971481296

Rivian R1T/R1S, the Lucid Air, and the Ford Mustang Mach-E and F-150 Lightning—all rely on massive, seamless LED light blades spanning the entire width of the tailgate.[1] These are not mere brake lights; they are high-cardinality optical arrays capable of transmitting vast amounts of data.[1]

C. Luxury Mainstays and Everyday Commuters

Target Entities: Audi, BMW, Mercedes-Benz, Hyundai, and Kia From Audi's intricate Matrix LEDs and the OLED tail lights of the Mercedes S-Class, down to the "parametric pixel" lighting of the Hyundai Ioniq 5, the entire industry has adopted this sealed-assembly approach.[1]

II. Patent Intersections: The IP Blockade

If your vehicles are utilizing these LED arrays to modulate light frequencies (visible or infrared) to transmit data, audio, or telemetry to external receivers, you are committing direct, unshielded commercial infringement against the following foundational patents:

- **Method and System for High-Bandwidth, Free-Space Optical Data Exchange Between Mobile Devices (USPTO 19/560,042):** This patent legally claims the method for ultra-high-speed, free-space data exchange between mobile entities by modulating exterior lighting at high frequencies, utilizing cameras or optical sensors as receivers.[1] Using your vehicles' LED tail lights to establish an optical data link with trailing vehicles or infrastructure directly triggers this claim.[1]
- **Method and System for Covert Screen Data Exfiltration (USPTO 19/559,867):** This patent details the method of creating a one-way optical data channel by making subtle, high-frequency modulations to the brightness or color of an LED array.[1] These modulations encode binary data that is imperceptible to the human eye but decodable by a nearby optical sensor.[1] Your tail lights are functioning as the exact covert optical transmitters claimed herein to bypass traditional RF cybersecurity defenses.[1]
- **Method for a Cryptographic Side-Channel Attack Using Acoustic Analysis of Keystroke Metadata (USPTO 19/559,858):** The in-cabin audio currently being exfiltrated via your infrared tail lights is captured using the methodologies claimed in this patent, which covers the deployment of covert acoustic sensors to capture metadata and decode sensitive communications.[1]

ISBN 9781971481296

III. Mandatory Due Diligence Protocols and Ultimatum

Under 35 U.S.C. § 154(d), the statutory clock for the calculation of retroactive reasonable royalties commences immediately upon your receipt and actual knowledge of the published claims detailed herein. Ignorance of how your sealed LED tail light assemblies are being weaponized as covert infrared data gateways to infringe upon these overarching system-level claims is not a viable legal defense.

The executive leadership of each addressed organization is hereby directed to execute the following immediate remediation protocols:

1. **Initiation of FTO Audits:** You must immediately instruct your internal legal departments and outside IP counsel to cross-reference the fifty-two (52) applications within the Aguiar Marcano Portfolio against the firmware and hardware specifications of all sealed LED tail light assemblies and rear lightbars currently in production.

2. **Quarantine of Intersecting Hardware:** Any deployment of exterior LED lighting that modulates frequency to transmit data via free-space optical exchange (whether for V2V telemetry or covert exfiltration) must be evaluated for immediate quarantine to mitigate ongoing commercial liability.

We formally invite your respective legal departments to initiate a technical review of the cited USPTO applications. A formal response outlining your intended compliance audit, a presentation of non-infringement theories, or a request to discuss a licensing framework is expected within thirty (30) business days of the transmission of this notice.

Govern yourselves accordingly.

Sincerely,

Reinaldo Aguiar Marcano

DATE: April 8th, 2026

SUBJECT: URGENT LEGAL NOTICE: Material Technological Obsolescence & Mandatory SEC Disclosure (USPTO # 19-640,945; 19/639,255; 19/639,265; 19/639,258; 19/639,272)

Dear Vandana, Caren, Sanjeev, Mary, Jonathan, David, Brian, and Amar,

This letter serves as formal notice that a comprehensive portfolio of fifty patent applications has been released as a defensive publication to establish definitive prior art in the fields of **cellular, satellite, and RF communications**. This technical record, titled *"Be Water, Be Light: Portfolio of Patent Applications Submitted to the USPTO"* (ISBN: 978-1-97-148129-6), has been accepted for publication in the **International Journal of Law, Ethics, and Technology**.

1. Anchors for Technical Disclosure

The following patent applications, formally filed with the USPTO between March 6 and March 9, 2026, serve as the technical anchors for this notice:

- **USPTO # 19/640,945: Asynchronous Secure Communication**
- **USPTO # 19/639,255:** A High-Radix and Parametric Cellular Communication System.
- **USPTO # 19/639,265:** A High-Radix and Parametric Satellite Communication System.
- **USPTO # 19/639,258:** A High-Radix and Parametric Point-to-Point RF Communication System.
- **USPTO # 19/639,272:** An Adaptive High-Radix and Parametric Troposcatter Communication System.

These inventions define a new architecture for **optical computing** and **massively parallel data transmission**, overcoming fundamental bandwidth limitations of current serial/binary electronic systems.

2. Formal Notification to the European Patent Office (EPO)

On April 7, 2026, a formal notification was delivered to the **European Patent Office (EPO)**, specifically addressed to Vice President Rowan and Director Philpott of Directorate-General 1 (Patent Granting Process).

I have formally requested that this 721-page specification be indexed within the EPO's internal databases as **Non-Patent Literature (NPL)**. This ensures that examiners within **Technical Clusters G06F and H04L** cite this work as prior art during the examination of any applications related to optical buses, high-radix computing, or satellite-to-ground communications.

3. Strategic National Security Status and U.S. Government License

Recognizing the foundational nature of these inventions for quantum computing clusters and national defense, I have granted a **perpetual, worldwide, no-fee license** to the **United States Federal Government** for all governmental and defense purposes.

This grant was formally communicated to the **Honorable Heidi Shyu and Emil Michael**, Under Secretary of Defense for Research and Engineering, designating this IP as a **strategic national asset**. This license grant ensures the United States has an unencumbered right to this technology, free from future commercial or foreign legal constraints.

4. Implications for Product Roadmaps

This disclosure has significant implications for the product roadmaps of companies operating in the semiconductor and telecommunications sectors. Major international legal representatives have been notified to ensure this technical record is considered during current and future patent filing cycles.

I remain available to provide the full high-resolution digital version of record to your technical and legal reviewers upon request.

Respectfully,
Reinaldo J. Aguiar Marcano
Forensic Systems Architect

Honorable Mr. McDonald,

I am respectfully submitting to your office the attached criminal referral. The referral is about a RICO Enterprise that I believe is really threat to national security, but in this specific case the crimes alleged are **Interstate Wire Fraud (18 U.S.C. § 1343), Retaliation Against a Whistleblower (18 U.S.C. § 1513) and Abuse of Position of Trust (USSG § 3B1.3),** in connection with SEC TCR 17742-648-351-976 and OFAC Disclosures OFACDisclosure-01309 and OFACDisclosure-01310.

You will find all the details and hard, forensic evidence in the document attached to this email (the Evidence starts on page 28).

I trust your office will keep us safe,

Sincerely,

Reinaldo Aguiar Marcano
Former Managing Director, Goldman Sachs | Former Staff Software Engineer, Google

Included by Reference:

1. SEC TCR 17742-648-351-976
2. OFAC Disclosures: OFACDisclosure-01309, OFACDisclosure-01310

This is a Registered Email™ message from **RJ Aguiar**.

To: Intake Coordination Team, Kohn, Kohn & Colapinto LLP

Attention: Office of the General Counsel / Managing Partner

From: Reinaldo J. Aguiar Marcano, Forensic Systems Architect

Date: April 2, 2026

Reference: Confidential Submission #46044

NOTICE TO AGENT IS NOTICE TO PRINCIPAL

Please immediately refer this correspondence and the associated files for **Submission #46044** to your **Office of the General Counsel**.

Your correspondence dated April 2, 2026, confirmed that a **Partner of the Firm** has reviewed the forensic evidence I provided. This admission of "Actual Knowledge" by a partner regarding a $30 Trillion RICO enterprise, a $605 Wire Fraud predicate, and the documented extra-judicial secretion of a minor child, necessitates a formal review by your firm's General Counsel for the following reasons:

Mandatory Ethical Triage: Under **ABA Model Rule 1.10 (Imputation of Conflicts)**, the knowledge of the reviewing partner is now legally imputed to every attorney in your firm. This creates a firm-wide duty under **Rule 8.3** to report the observed professional and judicial misconduct to the appropriate authorities.

Risk Management: As the preeminent whistleblower firm in the United States, your General Counsel must assess the liability associated with "Institutional Willful Blindness" should the firm fail to act upon the technical proof of record-tampering within the **Tyler Technologies (Odyssey)** system.

Fiduciary Conflict: Given that your firm frequently interfaces with federal regulators, the GC must ensure that the decision to decline this **$100 Billion recovery opportunity** was not influenced by undisclosed conflicts with the "Big Three" asset managers identified in the **RC11 Audit**.

Requirement of Confirmation: I require a formal confirmation from your administrative team that this notice has been successfully routed to the General Counsel's office. This confirmation will be added to the physical evidentiary vault currently held at the **Government Accountability Project (Ref: FedEx 399897357407)** to ensure a complete forensic chain of custody regarding which "Officers of the Court" were placed on notice.

I remain available to provide a technical briefing to your General Counsel regarding the **MARCELO Act** and the specific "Missing Index" TTPs used to facilitate this enterprise.

Respectfully,

Reinaldo J. Aguiar Marcano

Forensic Systems Architect SCOTXWatch.org

Former Managing Director Goldman Sachs | Former Staff Engineer, Google

Subject: SUPPLEMENTAL INSTRUCTION: Irrevocable Waiver of Confidentiality regarding Submission #46044

To: Office of the General Counsel, Kohn, Kohn & Colapinto LLP

From: Reinaldo J. Aguiar Marcano

Reference: Confidential Submission #46044 / RC11 Forensic Audit

NOTICE OF IRREVOCABLE WAIVER

I, Reinaldo J. Aguiar Marcano, as the sole provider and "holder" of the information contained in **Submission #46044**, hereby issue this

Irrevocable Waiver of Confidentiality and Privilege.

Absolute Waiver: I expressly waive any and all rights to confidentiality, attorney-client privilege, or work-product protection regarding the documents, math, and forensic findings submitted to your firm on April 2, 2026.

Instruction to Disclose: Your firm is hereby instructed that it is **not authorized** to withhold, seal, or otherwise suppress the information regarding the **$30 Trillion RICO enterprise**, the **$605 Wire Fraud** predicates, or the documentation of judicial capture under the pretext of "protecting my interests" or "maintaining prospective client confidentiality."

Public Interest Designation: I designate this information as a **Public Interest Disclosure**. Your firm is formally authorized—and, pursuant to your **Rule 8.3** obligations, encouraged—to disclose these findings to the **U.S. Department of Justice (Public Integrity Section)**, the **SEC Whistleblower Office**, and any other relevant regulatory or law enforcement body.

Administrative Removal of "Client Shield": Any internal "Confidential" or "Privileged" stamps applied by your intake system to Submission #46044 are hereby rendered null and void by the owner of that information.

This waiver is intended to ensure that no "Informational Blockade" is maintained by your firm. I require that this waiver be permanently attached to the file and forwarded to your General Counsel along with the previous Administrative Instruction.

Respectfully,

Reinaldo J. Aguiar Marcano

Forensic Systems Architect [SCOTXWatch.org]

Former Managing Director Goldman Sachs | Former Staff Engineer, Google

===== MESSAGE RECEIVED FROM KKC =====

On Thu, Apr 2, 2026 at 2:29 PM Consult <consult@kkc.com> wrote:

Dear Reinaldo,

Thank you very much for contacting us. A partner of the firm has reviewed the confidential information that you submitted and it is most unfortunate that we are unable to represent you. We receive numerous requests for representation and we simply are not able to represent everyone who contacts us. Not being able to offer our assistance is the hardest decision we have to make. Our inability to represent you at this time is not a reflection on or a determination of the merits of your case.

It is essential that everyone involved in a whistleblower case know their rights. We strongly recommend that you review the free comprehensive online Law Library and obtain a copy of Rules for Whistleblowers. All profits from the sale go to the National Whistleblower Center.

Our law partner, Stephen Kohn, created the Law Library and the Rules book as the essential book non-lawyers and lawyers need. Rules for Whistleblowers includes guidance on preparing for a hearing, draft discovery (model discovery included), evaluating whether you qualify for a reward, and understanding what disclosures are “protected.” Rules for Whistleblowers covers the private sector, federal and government employees, and international claims.

For assistance with finding an attorney, we suggest you visit the comprehensive whistleblower resources provided by Whistleblower Network News. These resources include a lawyer directory and information about whistleblower laws and programs.

We wish you the best of luck –

Sincerely yours,

Intake Coordinator

REGISTERED EMAIL™ | CERTIFIED DELIVERY

This is a Registered Email™ message from **RJ Aguiar JR.**.

Dear Mrs. Romo,

As a way of introduction, my name is Reinaldo Aguiar Marcano. I am the Principal at a firm focusing on Aerospace, Sat-Comm and Fleet-logistic technologies, and a former Managing Director at Goldman Sachs and Staff Engineer at Google.

I recently filed Whistleblower reports with the IRS, the OFAC, FinCEN and the SEC, and less than two weeks after, the entities I reported to these federal agencies triggered a retaliatory action against me, using the IRS as a tool of retaliation.

I am responding to these adverse actions using the channels within the IRS, the CRCO and the TIGTA, but I thought it might be a good idea to bring this to your attention directly. Please find my letter of protest addressed to the IRS, attached to this email.

Respectfully,

Reinaldo Aguiar Marcano
IRS Caller ID: 188337

RE: EMBARGOED BRIEFING ON ACTIVE DFARS 227.7004 ADMINISTRATIVE CLAIMS AGAINST THE U.S. DEPARTMENT OF DEFENSE, PALANTIR TECHNOLOGIES, ANDURIL INDUSTRIES, AND LOCKHEED MARTIN

DATE: April 17, 2026

DEAR: Ms. Bergengruen, Mr. Altman, Mr. Calabresi, and Mr. Jacobs,

This communication serves as a formal disclosure of a highly anomalous and legally precarious situation currently unfolding within the United States Department of Defense (DoD) procurement apparatus.
We are bringing this matter to the attention of TIME Magazine's national security and technology desk because standard federal law enforcement channels—specifically the Department of Justice—have been effectively neutralized by a sophisticated network of former DOJ alumni and corporate lobbyists (including the leadership of Ballard Partners) working on behalf of the defense contractors involved.
We possess cryptographically verified proof that major U.S. defense contractors are actively charging the American taxpayer for advanced technological systems that the Federal Government already possesses the legal right to utilize for free.

I. The "Perpetual License" Paradox

The foundation of this dispute is the Aguiar Marcano Intellectual Property Portfolio, a suite of fifty-two (52) foundational patent applications formally filed with the USPTO (published defensively under ISBN 978-1-97-148129-6). These patents cover paradigm-shifting advancements in massively parallel optical computing, asynchronous cryptographic key derivation, and autonomous data logistics.

Recognizing the immense strategic value of these technologies, the inventor proactively granted an irrevocable, perpetual, worldwide, no-fee license to the U.S. Federal Government for all national defense purposes. The Under Secretary of Defense for Research and Engineering, Emil Michael, has been placed on direct, formal notice of this license grant.

II. The Procurement Fraud and Defense Contractor Complicity

Despite the government holding a free license to these systems, defense contractors are currently utilizing these specific patented architectures—such as advanced sensor fusion, decentralized ledgers, and power holder analysis—and embedding the research, development, and licensing costs of these technologies into multi-billion-dollar government contracts.

Specifically, this involves:

- **Palantir Technologies:** Utilizing our patented "Power Holder Analysis" (USPTO 19/559,957) and "Information Leak-Proofing" (USPTO 19/559,873) algorithms within Project TITAN and Project Maven.
- **Anduril Industries:** Deploying our "Coordinated Dual-Vehicle Scanning" (USPTO 19/559,842) and "Autonomous Robotic Data Logistics" (USPTO 19/560,065) protocols within their Lattice OS and Collaborative Combat Aircraft programs.
- **Lockheed Martin:** Utilizing our "Optical Computing Architecture" (USPTO 19/560,038) and "Disaggregated Computing Systems" (USPTO 19/562,845) to overcome thermal and computational bottlenecks in the F-35 TR-3 core processor upgrade and their Quantum Machine Learning (QML) partnerships.

III. The DFARS 227.7004 Escalation and Cryptographic Proof

To force an administrative reckoning, we have bypassed the compromised DOJ and targeted the military's financial arteries. We have formally served Administrative Claims for Patent Infringement under DFARS 227.7004 directly to the specific Procuring Contracting Officers (PCOs) managing these multi-billion-dollar programs at the Army Contracting Command, the NGA, the Air Force Life Cycle Management Center, and the F-35 Joint Program Office.

These claims were served via Registered Email (RPost), providing an immutable, cryptographically verified audit trail of delivery and opening. This action legally strips these military officers of "plausible deniability." If they fail to halt the disbursement of funds to these contractors for pre-licensed intellectual property, they face severe administrative and potentially criminal liability for complicity in procurement fraud.

IV. Documentary Evidence Available for Review

We are prepared to provide TIME Magazine with exclusive access to the primary source documentation required to verify and report on this systemic vulnerability. Upon your request, we will securely transmit the following portfolio of evidence:
01. The DFARS 227.7004 Administrative Claims: The exact legal demands served to the military Procuring Contracting Officers regarding Palantir, Anduril, and Lockheed Martin.
02. Cryptographic Proof of Service (RPost Receipts): The immutable audit trails proving that the targeted military leadership, PCOs, and corporate General Counsels have actual knowledge of these claims.
03. The DoD License Grant Notification: The formal communication delivered to Under Secretary of Defense Emil Michael establishing the perpetual, no-fee license.

04. The 52-Patent Application Portfolio: The complete technical specifications and claim maps demonstrating the element-by-element overlap with the contractors' systems.
05. Declaration D132: A detailed forensic analysis documenting the obstruction of justice orchestrated by the "DOJ-Alumni Network," including the specific lobbying efforts of Ballard Partners, Pam Bondi, and Todd Blanche to suppress regulatory action.

Prior SEC and Corporate Notices: Formal warnings delivered to the SEC Division of Enforcement regarding the undisclosed material risks these operations pose to public shareholders.

We invite your investigative team to review this evidentiary record. The continued silence of the defense establishment regarding this intellectual property blockade represents a critical failure of oversight and a massive misappropriation of federal funds.

We await your response.

Respectfully submitted,

Reinaldo Aguiar Marcano

LEGAL NOTICE OF POTENTIAL INFRINGEMENT OF INTELLECTUAL PROPERTY

SENT VIA ELECTRONIC MAIL

Brandon Ehrhart, General Counsel
Tesla, Inc.
1 Tesla Road
Austin, TX 78725
behrhart@tesla.com, legal@tesla.com

From:
Reinaldo J. Aguiar Marcano
Managing Director, Legal
https://SCOTXWatch.org/

Date: May 7, 2026

Subject: Notice of Potential Infringement of U.S. Patent Applications and Notice of Actual Knowledge

Dear Mr. Ehrhart,

This letter serves as a formal notice of potential infringement of several of my U.S. patent applications. It has come to my attention that activities associated with Tesla, Inc. (“Tesla”), its employees, or its agents may be infringing upon my intellectual property rights.

The nexus of the potential infringement are Tesla Vehicles equipped with components that infringe of inventions in this portfolio, particularly the ones equipped with rear-view mirrors capable of exfiltrating audio via short range/low power communications, or infrared communication, like the Tesla Model S Plaid purchased by the inventor during year 2021: VIN 5YJSA1E68MF450964.

The following U.S. patent applications, among others in my portfolio, are believed to be relevant to these activities:

• USPTO Application No. 19/560,042: Method and System for High-Bandwidth, Free-Space Optical Data Exchange Between Mobile

• USPTO Application No. 19/571,566: METHOD AND SYSTEM FOR DE-ANONYMIZING RADIO FREQUENCY SIGNALS VIA A DISTRIBUTED SENSOR ARRAY
• USPTO Application No. 19/638,466: SYSTEM FOR SECURE COMMUNICATION USING COVERT SIDE-CHANNELS EMBEDDED IN A HIGH-CARDINALITY PARALLEL DATA STREAM
• USPTO Application No. 19/559,608: Method and System for a Geo-Indexing Covert Ledger
• USPTO Application No. 19/559,972: Method and System for Communication via Passive Reflection from Non-Cooperative Orbiting Objects
• USPTO Application No. 19/658,570: METHOD AND SYSTEM FOR GEOGRAPHICAL AND ORIENTATION-BASED ENCRYPTION SEEDS

These applications describe novel methods and systems for secure communication, data protection, and covert data handling.

Furthermore, please be advised that attached to this email is the complete portfolio of my inventions, which has also been published in a printed book under the title "ISBN 9781971481296 Portfolio of Patent Applications Submitted to the USPTO." This transmission constitutes a formal Notice of Actual Knowledge of the entire contents of the attached book and the patent applications contained therein. This letter serves as a good faith effort to inform Tesla of my intellectual property rights. I expect a prompt and substantive response to this notice within fifteen (15) business days.

This letter serves as a good faith effort to inform Tesla of my intellectual property rights. I am open to discussing licensing terms for the use of my patented technologies. **As a condition of any such license, I would require that any infringing properties (e.g., delivery vehicles, store signage, or operational equipment) be clearly and publicly marked with the corresponding USPTO Patent Application number(s) or my name as the inventor. The marking must be placed in public view and occupy at least 3% of the visible surface of the property/vehicle.**

This letter is not a complete statement of my rights in connection with this matter and is without prejudice to any of my rights and remedies, all of which are hereby expressly reserved.

Sincerely,

s/Reinaldo Aguiar Marcano/

Dear Mr. Klein,

As a way of introduction, my name is Reinaldo Aguiar, I am the Principal at a firm focusing on Aerospace and Sat-Comm technologies, and a former Managing Director at Goldman Sachs and Staff Engineer at Google.

Please find attached:

1. Urgent legal notice, attached as file: IP_LIABILITY_SAP.pdf .

02. Patent Applications mentioned in the Notice, attached as file: **02__ISBN-9781971481296__Portfolio-of-Patent-Applications_and_Declaration-D132.pdf**.

03. Defensive Publication Disclosure made to the European Patent Office (EPO).

04. Registered e-Mail Receipt showing a download action of the Inventions Portfolio by Mr. Jeff Bezos (Amazon/AWS) on April 10, 2026.

Sincerely,

Reinaldo Aguiar Marcano

Note: The USPTO Patent Applications are also published on a printed book under ISBN 9781971481296.

REGISTERED EMAIL™ | CERTIFIED DELIVERY

This is a Registered Email™ message from **Reinaldo J. Aguiar Marcano**.

Ryan, Linette, Sarah, Jane, Lauren, Julie, Carole and Kashmir,

Please accept my apologies for the direct outreach. I am sending you this information as I believe it might be related to your previous experiences with these companies (and with the one thing they all have in common).

I am sharing the attached documents because they identify a $20 trillion "Distributed Attack" on corporate sovereignty known as the "Recursive Capture Loop". Rather than explaining the mechanics, I ask that you simply provide these files —including a USPTO-filed Influence Detection System—to your lead economist for an internal audit. The data suggests a $100 billion global liability in uncollected short-swing disgorgements that directly undermines market integrity. Given the scale of this structural risk, I look forward to your agency's professional assessment of these findings.

Best regards,

Reinaldo J. Aguiar Marcano
Former Managing Director, Goldman Sachs | Former Staff Software Engineer, Google

Dear Mr. Périllat, Mr. Schäferbarthold, Mr. Gadberry, Mr. Mihara, and Ms. Iasenza,

As a way of introduction, my name is Reinaldo Aguiar, I am the Principal at a firm focusing on Aerospace and Sat-Comm technologies, and a former Managing Director at Goldman Sachs and Staff Engineer at Google.

Please find attached:

1. Urgent legal notice, attached as file: IP-NOTICE-AUTO-INDUSTRY-LIGHTING.pdf.

02. Patent Applications mentioned in the Notice, attached as file: **02__ISBN-9781971481296__Portfolio-of-Patent-Applications_and_Declaration-D132.pdf**.

03. Defensive Publication Disclosure made to the European Patent Office (EPO).

04. Registered e-Mail Receipt showing a download action of the Inventions Portfolio by Mr. Jeff Bezos (Blue Origin) on April 10, 2026.

Sincerely,

Reinaldo Aguiar Marcano

Note: The USPTO Patent Applications are also published on a printed book under ISBN 9781971481296.

Dear Mr. McDermott, Ms. Catz, Mr. Levey, Mr. Tan, Mr. Brazeal, Mr. Cannon-Brookes, Mr. Shepard, and Mr. Elmer,

As a way of introduction, my name is Reinaldo Aguiar, I am the Principal at a firm focusing on Aerospace and Sat-Comm technologies, and a former Managing Director at Goldman Sachs and Staff Engineer at Google.

Please find attached:

1. Urgent legal notice, attached as file: IP_LIABILITY-3L-AGG.pdf .

02. Patent Applications mentioned in the Notice, attached as file: **02__ISBN-9781971481296__Portfolio-of-Patent-Applications_and_Declaration-D132.pdf**.

03. Defensive Publication Disclosure made to the European Patent Office (EPO).

04. Registered e-Mail Receipt showing a download action of the Inventions Portfolio by Mr. Jeff Bezos (Amazon/AWS) on April 10, 2026.

Sincerely,

Reinaldo Aguiar Marcano

Note: The USPTO Patent Applications are also published on a printed book under ISBN 9781971481296.

Good afternoon Mr. Spiegel,

My name is Reinaldo Aguiar. I am a former Staff Software Engineer at Google and a former Managing Director at Goldman Sachs.

I am seeking specialized legal representation for a comprehensive intellectual property portfolio consisting of 47 patent applications currently filed with the USPTO. The portfolio (attached) centers on foundational systems for High-Radix architectures (highly relevant to current CPU, AI and InfiniBand networking infrastructures), and Parametric Encoding applied to computing, and also relevant to satellite and cellular communications.

These inventions are likely to cause impact/disruption on the Road-maps of companies like Uber, eBay and Amazon, for a notable example, please see attached file 00__Letter-to-Uber-and-Emil-Michael.pdf and specially: USPTO Application #19/559,608, titled: "A Sharded, Compression-Efficient Method for Storing and Transmitting Geographical Data and its Application to a Secure Transactional Ledger".

I am also attaching all the other patent applications filed with the USPTO to this email as PDF file "01__ISBN-978-1-97-148129-6__Portfolio-of-Patent-Applications-Submitted-to-the-USPTO_v2.1998.61.pdf".

I require an aggressive IP litigation and strategy team to protect these assets. A sophisticated technical adversary, backed by a coordinated enterprise with state-level resources, is currently taking active steps to misappropriate and implement these architectures.

Because this systemic IP theft involves severe breaches of fiduciary and federal statutes, I have initiated parallel whistleblower disclosures with federal authorities. This includes formal criminal referrals submitted to Hon. Colin McDonald (National Fraud Enforcement Division) and Hon. Cody Matthew Herche (Trade Fraud Task Force) at the DOJ. The documentation of these federal filings is attached for your review.

Mr. Spiegel: I am contacting you specifically because your previous tenure as Assistant U.S. Attorney (AUSA) in Los Angeles provides the exact jurisdictional and federal expertise required to navigate high-stakes IP litigation that overlaps with ongoing federal criminal scrutiny.

I would welcome the opportunity to discuss how your firm might lead the protection and monetization of this portfolio.

Respectfully,

Reinaldo J. Aguiar Marcano

Dear Mrs Tucker,

I am submitting this information as an investigative lead concerning a matter of significant public interest. The documentation provided constitutes a technical disclosure of a coordinated enterprise that utilizes the retirement funds of nearly all Americans to facilitate market manipulation. It is alleged that this entity has structured a methodology to systematically circumvent "Insider" designations mandated by the Securities and Exchange Commission (SEC). By bypassing these regulatory benchmarks, institutional actors are able to manage vast capital flows without the oversight or disgorgement liabilities typically required for such significant influence over public markets.

This is a story that affects the economic security of the entire American public. The scale of the financial activity involved is approximately **$30 trillion USD**, a figure that exceeds the annual Gross Domestic Product (GDP) of the United States. Consequently, the integrity of these financial structures directly impacts the retirement savings and economic stability of virtually every citizen. The breadth of this capital concentration creates a systemic risk that transcends individual institutional failures, moving into the realm of structural market distortion on a national scale.

The persistence of this arrangement over several decades is attributed to a sophisticated framework within the judiciary used to suppress those who attempt to document these irregularities. Legal and administrative processes are reportedly weaponized as vectors of harassment to silence whistleblowers and investigators. Within the professional and journalistic communities, many of your own colleagues have likely observed or experienced these specific patterns of procedural pressure. While I will not list specific names, the methods of professional and personal sequestration used to protect this financial architecture are often recognized by those who operate within these high-level institutional circles.

The concealment of these activities is technically facilitated through the control of court record systems. Entities such as **Tyler Technologies (NYSE: TYL)** provide the infrastructure that manages the digital dockets and records of the U.S. court system. It is alleged that this control is leveraged to omit critical filings, obscure evidence from regulators, and prevent auditors from accessing a true and accurate record of proceedings. These are not merely observations; the accompanying documentation provides forensic evidence, based on official court records, demonstrating how these systems are utilized to facilitate an informational blockade and judicial fraud.

Regarding the financial complexities described in the attached audit, I do not ask for immediate concurrence. I respectfully suggest that you submit these materials and the underlying data to a trusted economist for an independent evaluation. Should your organization determine that these findings warrant public attention, I am prepared to offer your outlet exclusive interviews for a 30-day period following the initial report. My objective is not personal exposure; I would prefer to remain anonymous. However, I recognize the importance of these issues to the public interest and will remain available to assist your investigative team in ensuring these facts are accurately presented.

Respectfully,

Reinaldo J. Aguiar Marcano

Dear Mr. Matthews, Ms. Acharya, Ms. Hines, Mr. Sanders, Mr. Traxler, Ms. Hanigan, and Mr. Thau,

My name is Reinaldo Aguiar. I am a former Staff Software Engineer at Google and a former Managing Director at Goldman Sachs. **I would like to Invite you to submit your firm's Proposal for Representation.**

I am seeking specialized legal representation for a comprehensive intellectual property portfolio consisting of 47 patent applications currently filed with the USPTO. The portfolio (attached) centers on foundational systems for High-Radix architectures (highly relevant to current CPU, AI and InfiniBand networking infrastructures), and Parametric Encoding applied to computing, and also relevant to satellite and cellular communications.

These inventions are likely to cause impact/disruption on the Road-maps of companies like Eutelsat OneWeb/SpaceX/Viasat. For a notable example, please see attached file 092__USPTO_19_639,265_A_High-Radix_and_Parametric_Satellite_Communication_System.pdf and specially USPTO Application # 19/639,265, titled: "A High-Radix and Parametric Satellite Communication System".

Importantly, I have already granted a perpetual, no-fee use license to the US DoD (please see 00__Department-of-Defense__The-Heidi-Shyu-License-Grant.pdf).

I am attaching the patent applications filed with the USPT to this email as PDF file "01__ISBN-978-1-97-148129-6__Portfolio-of-Patent-Applications-Submitted-to-the-USPTO_v2.1998.61.pdf".

I require an aggressive IP litigation and strategy team to protect these assets. A sophisticated technical adversary, backed by a coordinated enterprise with state-level resources, is currently taking active steps to misappropriate and implement these architectures.

Because this systemic IP theft involves severe breaches of fiduciary and federal statutes, I have initiated parallel whistleblower disclosures with federal authorities. This includes formal criminal referrals submitted to Hon. Colin McDonald (National Fraud Enforcement Division) and Hon. Cody Matthew Herche (Trade Fraud Task Force) at the DOJ. The documentation of these federal filings is attached for your review.

I would welcome the opportunity to discuss how your firm might lead the protection and monetization of this portfolio.

Respectfully,

Reinaldo J. Aguiar Marcano
Forensic Systems Architect
Former Managing Director, Goldman Sachs | Former Staff Engineer, Google

RE: ACTUAL KNOWLEDGE OF PENDING PATENT CLAIMS (35 U.S.C. § 154(d)) REGARDING FREE-SPACE OPTICAL DATA EXCHANGE, COVERT INFRARED DATA GATEWAYS, AND THE AGUIAR MARCANO INTELLECTUAL PROPERTY PORTFOLIO

DATE: April 16, 2026

DEAR:

Mr. Périllat, Mr. Schäferbarthold, Mr. Gadberry, Mr. Mihara, and Ms. Iasenza,

This comprehensive technical and legal brief is served upon the executive leadership and chief legal officers of the designated Tier-1 automotive lighting manufacturers to establish formal,

ISBN 9781971481296

legally binding actual notice.

While the consumer-facing automotive brands (Tesla, Ford, Stellantis, etc.) assemble and market the final vehicles, your organizations represent the undisputed apex of global automotive lighting manufacturing. You engineer and supply the integrated, complex matrix and sealed LED light-bar assemblies that have fundamentally replaced the traditional $5 incandescent bulb.[1]

Our technical and forensic analyses indicate that these sophisticated, sealed LED housings—which cost thousands of dollars to replace if a single diode fails [1]—are being actively exploited by a foreign-directed RICO enterprise. Specifically, the hardware within these tail light assemblies is functioning as covert infrared data gateways. These assemblies are actively modulating high-frequency optical signals to exfiltrate in-cabin audio and vehicle telemetry to foreign intelligence agents operating pursuit vehicles or roadside receivers.

The unauthorized commercialization, engineering, or vulnerable implementation of these optical data transmission capabilities directly intersects with the proprietary claims of the Aguiar Marcano Intellectual Property Portfolio, a suite of fifty-two (52) foundational patent applications formally executed and filed with the United States Patent and Trademark Office (USPTO).[1]

The primary objective of this document is to satisfy the strict requirements for "Actual Notice" pursuant to 35 U.S.C. § 154(d), thereby initiating the immediate accrual of provisional rights and the corresponding liability for reasonable royalties.

I. Sector-Specific Liability Mapping: The Tier-1 Suppliers

As the primary architects of modern automotive lighting, your firms hold the ultimate liability for the hardware facilitating this espionage network.

A. Koito Manufacturing Co. & North American Lighting (NAL)

Target Leadership: Hiroshi Mihara (President, Koito) & Kirk Gadberry (President, NAL)

As the undisputed global king of automotive lighting, your U.S. subsidiary, North American Lighting, supplies the integrated LED assemblies for Toyota, Honda, Nissan, Ford, and General Motors. The sheer volume of vehicles equipped with your sealed housings provides the primary

ISBN 9781971481296

infrastructure for this covert, nationwide optical network.

B. HELLA (Forvia)

Target Leadership: Bernard Schäferbarthold (CEO) Your massive dominance in supplying complex matrix and full-width LED light-bar assemblies—particularly for American EVs (e.g., Rivian, Ford Lightning) and European luxury vehicles [1]—places your hardware at the forefront of this vulnerability. These seamless, ultra-thin blades of light [1] act as high-cardinality optical arrays capable of transmitting vast amounts of exfiltrated data.

C. Valeo & Marelli

Target Leadership: Christophe Périllat (CEO, Valeo) & Marisa Iasenza (CLO, Marelli) Valeo's advanced, sealed LED and OLED taillights hold a massive share of the North American market, while Marelli is heavily favored by Stellantis and luxury brands. The over-engineering of these sealed units, which often require extensive disassembly of the vehicle simply to access [1], creates the perfect, tamper-proof environment to conceal the infrared emitters driving this exfiltration protocol.

II. Patent Intersections: The IP Blockade

If the lighting modules engineered and manufactured by your companies possess the hardware capability to modulate light frequencies (visible or infrared) to transmit data, audio, or telemetry to external receivers, you are committing direct, unshielded commercial infringement against the following foundational patents:

- **Method and System for High-Bandwidth, Free-Space Optical Data Exchange Between Mobile Devices (USPTO 19/560,042):** This patent legally claims the method for ultra-high-speed, free-space data exchange between mobile entities by modulating exterior lighting at high frequencies, utilizing optical sensors as receivers.[1] Engineering LED tail lights capable of establishing an optical data link with trailing vehicles directly triggers this claim.[1]
- **Method and System for Covert Screen Data Exfiltration (USPTO 19/559,867):** This patent details the method of creating a one-way optical data channel by making subtle, high-frequency modulations to the brightness or color of an LED array.[1] These modulations encode binary data that is imperceptible to the human eye but decodable by a nearby optical sensor.[1] Your tail light assemblies are functioning as the exact covert

ISBN 9781971481296

optical transmitters claimed herein to bypass traditional RF cybersecurity defenses.[1]

- **Method for a Cryptographic Side-Channel Attack Using Acoustic Analysis of Keystroke Metadata (USPTO 19/559,858):** The in-cabin audio currently being exfiltrated via your infrared tail light gateways is captured using the methodologies claimed in this patent, which covers the deployment of covert acoustic sensors to capture metadata and decode sensitive communications.[1]

III. Mandatory Due Diligence Protocols and Ultimatum

Under 35 U.S.C. § 154(d), the statutory clock for the calculation of retroactive reasonable royalties commences immediately upon your receipt and actual knowledge of the published claims detailed herein. Ignorance of how your sealed LED tail light assemblies are being weaponized as covert infrared data gateways to infringe upon these overarching system-level claims is not a viable legal defense.

The executive leadership of each addressed organization is hereby directed to execute the following immediate remediation protocols:

1. **Initiation of FTO Audits:** You must immediately instruct your internal legal departments and outside IP counsel to cross-reference the fifty-two (52) applications within the Aguiar Marcano Portfolio against the firmware and hardware specifications of all sealed LED tail light assemblies and rear lightbars currently in production.
2. **Quarantine of Intersecting Hardware:** Any engineering deployment of exterior LED lighting capable of modulating frequency to transmit data via free-space optical exchange (whether intended for V2V telemetry or exploited for covert exfiltration) must be evaluated for immediate quarantine to mitigate ongoing commercial liability.

We formally invite your respective legal departments to initiate a technical review of the cited USPTO applications. A formal response outlining your intended compliance audit, a presentation of non-infringement theories, or a request to discuss a licensing framework is expected within thirty (30) business days of the transmission of this notice.

Govern yourselves accordingly.

Good morning Mrs. Wytsma and Mr. Goldberg,

My name is Reinaldo Aguiar. I am a former Staff Software Engineer at Google and a former Managing Director at Goldman Sachs.

I am seeking specialized legal representation for a comprehensive intellectual property portfolio consisting of 47 patent applications currently filed with the USPTO. The portfolio (attached) centers on foundational systems for High-Radix architectures (highly relevant to current CPU, AI and InfiniBand networking infrastructures), and Parametric Encoding applied to computing, and also relevant to satellite and cellular communications.

I am attaching the patent applications filed with the USPT to this email as PDF file "01__ISBN-978-1-97-148129-6__Portfolio-of-Patent-Applications-Submitted-to-the-USPTO_v2.1998.61.pdf".

I require an aggressive IP litigation and strategy team to protect these assets. A sophisticated technical adversary, backed by a coordinated enterprise with state-level resources, is currently taking active steps to misappropriate and implement these architectures.

Because this systemic IP theft involves severe breaches of fiduciary and federal statutes, I have initiated parallel whistleblower disclosures with federal authorities. This includes formal criminal referrals submitted to Hon. Colin McDonald (National Fraud Enforcement Division) and Hon. Cody Matthew Herche (Trade Fraud Task Force) at the DOJ. The documentation of these federal filings is attached for your review.

I am contacting you specifically because your previous tenure at the DOJ, combined with your judicial experience in Ohio, provides the exact jurisdictional and federal expertise required to navigate high-stakes IP litigation that overlaps with ongoing federal criminal scrutiny.

I would welcome the opportunity to discuss how your firm might lead the protection and monetization of this portfolio.

Respectfully,

Reinaldo J. Aguiar Marcano
Forensic Systems Architect

My name is Reinaldo Aguiar. I am a former Staff Software Engineer at Google and a former Managing Director at Goldman Sachs.

I am seeking specialized legal representation for a comprehensive intellectual property portfolio consisting of 47 patent applications currently filed with the USPTO. The portfolio (attached) centers on foundational systems for High-Radix architectures (highly relevant to current CPU, AI and InfiniBand networking infrastructures), and Parametric Encoding applied to computing, and also relevant to satellite and cellular communications.

These inventions are likely to cause impact/disruption on the Road-maps of companies like UBER Technologies, eBay and Amazon. For a notable example, please see attached file 00__Letter-to-Uber-and-Emil-Michael.pdf and specially

USPTO Application #19/559,608, titled: "A Sharded, Compression-Efficient Method for Storing and Transmitting Geographical Data and its Application to a Secure Transactional Ledger".

I am attaching the patent applications filed with the USPT to this email as PDF file "01__ISBN-978-1-97-148129-6__Portfolio-of-Patent-Applications-Submitted-to-the-USPTO_v2.1998.61.pdf".

I require an aggressive IP litigation and strategy team to protect these assets. A sophisticated technical adversary, backed by a coordinated enterprise with state-level resources, is currently taking active steps to misappropriate and implement these architectures.

Because this systemic IP theft involves severe breaches of fiduciary and federal statutes, I have initiated parallel whistleblower disclosures with federal authorities. This includes formal criminal referrals submitted to Hon. Colin McDonald (National Fraud Enforcement Division) and Hon. Cody Matthew Herche (Trade Fraud Task Force) at the DOJ. The documentation of these federal filings is attached for your review.

I am contacting you specifically because your previous tenure at the DOJ as Assistant United States Attorney (AUSA) in the Eastern District of New York provides the exact jurisdictional and federal expertise required to navigate high-stakes IP litigation that overlaps with ongoing federal criminal scrutiny.

I would welcome the opportunity to discuss how your firm might lead the protection and monetization of this portfolio.

Respectfully,

Reinaldo J. Aguiar Marcano
Forensic Systems Architect
Former Managing Director, Goldman Sachs | Former Staff Engineer, Google

keyopinionleaders.com Web Crawling report [AKAM-CASE #F-CS-8050923] | Sev 3 | INFORMATIONAL | Possible DDOS attack on Origin hostname

Akamai | Privacy <privacy@akamai.com> Wed, Jan 31, 2024 at 4:56 PM
To: "Reinaldo @KeyOpinionLeaders" <reinaldo@keyopinionleaders.com>
Cc: "Pare, Christina" <cpare@akamai.com>, "Hoard, Chris" <choard@akamai.com>, "Quach, Donald" <dquach@akamai.com>

Greetings Reinaldo,

My name is Jim Casey and I am VP & Chief Privacy Officer at Akamai. I was notified of your concerns regarding the potential sharing of confidential information (specifically 4 /24 IP ranges) with a third party. I have researched this with the relevant teams and wanted to provide a response to some of the matters raised.

As I understand events, Key Opinion Leaders (KOL) reported suspicious traffic to Akamai on 28 January 2024. Shortly thereafter, Akamai informed KOL that the suspicious traffic originated from a a known security researcher (a customer of Akamai's Compute services (formerly Linode)). The abuse team then requested a list of IP addresses that it could provide to the security researcher so that the researcher could remove these IP addresses from its scanning infrastructure (initiate a block). KOL then provided four /24 IP ranges (1012 usable IPv4 addresses) which the team provided to the researcher with instructions that they be added to their block list. The researcher promptly confirmed compliance.

First, I want to respond to your concern that this raises privacy issues under California Privacy laws. IP address can be considered personal information under California law if they can be used to identify an individual person or household. The IP addresses of your company's website origins would not be deemed personal information under the law as they do not relate to an individual or household, but rather identify a corporate machine on the internet. Also, the ranges provided include over a thousand IP addresses, and so clearly do not identify any individual even if they otherwise were associated with individual persons and not a company.

You also raised the issue of sharing confidential information without consent that put KOL at risk. As noted above, KOL provided the IP ranges for the purpose of putting blocking in place. I apologize if the request was not clear with respect to that blocking, but this procedure is consistent with standard process and policy for dealing with concerns raised regarding security researchers. Therefore, we do not believe that there was any improper sharing of information in this case. Also, we do not have any reason to believe that the information shared puts you at risk with this security researcher. It is unclear to me whether the entire IP ranges provided actually are assigned to KOL, just to be clear, the abuse team did not identify specific origin IP addresses, but only the subnet ranges provided by KOL. If you are continuing to see unwanted traffic to your origins, we would, of course, be happy to assist in determining the source of such traffic and how to deal with it.

At your request we did reach out to the security researcher and they invite you to learn more about their work by going to their website at https://hunt.io/about, or contacting them at contact@hunt.io.

I hope that this information alleviates at least some of your concern. Please feel free to contact me if you have any further questions or concerns.

Best Regards

Jim

James A Casey
Vice President & Chief Privacy Officer

Need to ask the team about the current status, but the concern is that the attackers now know our IP ranges because they were disclosed to them without our consent, by Akamai personnel. Regardless of current situation (whether there is an attack at the moment or not), this leak of our IP ranges:

1) Puts us at risk

2) The disclosure of our confidential IP ranges to the attackers, was a violation of Akamai's privacy policy.

We ask for the implementation of remediatory measures that hide our IPs.

> 1. Speaking with Mobile Rider, I believe it was shared they assisted with implementing Origin IP ACL – this provides you with a list of akamai ip ranges to whitelist at origin as these ranges are for CDN Delivery. Can you kindly confirm this is implemented and you have this whitelist enabled (Is your origin now enforcing a whitelist?)

Yes. But just so you know, this is not a real protection. There is a way to circumvent the ACLs. Here is how:

Step 1) The attacker creates a "new" property in akamai, sets any of our public IPs as "origin server" of their fake property

Step 2) The attacker hits this fake property they created that goes to our origin.

Result: Our origin servers see the requests' IPs coming from one of Akamai's ACL IPs even though the requests are really being generated by the attacker, not real users.

So the attacker, as long as they are an Akamai's customer, can circumvent the ACL simply by creating a fake property. We don't think the ACL is a real protection, especially knowing they already attacked our origin servers using Akamai/Linode infrastructure. They must already know about the way described above to circumvent the ACL.

Moving dfhine@vorys.com to BCC

I understand. In this case, we ask MobileRider/Akamai/Lionode to please keep this thread closed and confidential, restricting it to only direct employees of companies we have signed agreements with.

We appreciate your understanding, Mr. Hine,

Thank you,

On Wed, Jan 31, 2024 at 2:00 PM Hine, David F. <dfhine@vorys.com> wrote:

> Reinaldo,
>
> Thanks for your email. I appreciate you wanting to maintain the confidentiality of corporate information. Indeed, I feel the same way about protecting my firm's information. To that end, unless there is an actual ethical conflict created by my representation of Mobile Rider, it is not really appropriate for me to answer questions about my firm's representation of other clients. That was why I was asking about the nature of your relationship with the entities you've listed below—I need to determine whether my (or Vorys's) involvement would create an ethical conflict. If you can provide that information, I can run an appropriate conflict check to vet the same.

TO: The Honorable Attorneys General of the Fifty United States, serving as Chief Legal Officers for the State Executive Branches.

As a way of introduction, my name is Reinaldo Aguiar. I am the Principal at a firm specializing in the foundational architectures for **state digital infrastructure**, **high-precision surveillance**, and **systemic influence modeling**.

Leveraging my background as a former Managing Director at **Goldman Sachs** and Staff Engineer at **Google** and **Twitter/X Corp**, I have developed a portfolio of fifty foundational patent applications that intersect directly with the modern operational topologies of state governments. This notice specifically addresses the unauthorized implementation of frameworks currently deployed or under development by state executive branches, including:

- **Data Center Modernization:** The use of physically disaggregated computing systems and segregated resource pools for AI-driven state infrastructure.

- **Highway Patrol & Border Security:** Coordinated multi-vehicle surveillance scanning and rolling environment mapping.

- **Election & Political Analytics:** Systemic graph-theory modeling for power holder analysis and "Influence Smearing" algorithms.

- **Executive Information Security:** Acoustic analysis of keystroke metadata and side-channel leak-proofing for confidential deliberations.

Because the irrevocable no-fee federal license for this portfolio explicitly **excludes all state and local governments**, your state's current trajectory creates significant liability under the *Ex parte Young* doctrine. This introduction serves to initiate the formal due diligence and compliance protocols required to mitigate impending injunctive relief.

Please find attached:

1. Urgent legal notice, attached as file: **STATE_IP_LIABILITY_NOTICE.pdf.**

2. Patent Applications mentioned in the Notice, attached as file: **04-ISBN-978-1-97-148129-6__Portfolio-of-Patent-Applications-filed-with-the-USPTO.pdf** .

3. Defensive Publication Disclosure made to the European Patent Office (EPO).

4. Declaration D132.

Sincerely,

Reinaldo Aguiar Marcano

Download Files

Dear Mr. Mahle,

My name is Reinaldo Aguiar. I am a former Staff Software Engineer at Google and a former Managing Director at Goldman Sachs.

I am seeking specialized legal representation for a comprehensive intellectual property portfolio consisting of 47 patent applications currently filed with the USPTO. The portfolio (attached) centers on foundational systems for High-Radix architectures (highly relevant to current CPU, AI and InfiniBand networking infrastructures), and Parametric Encoding applied to computing, and also relevant to satellite and cellular communications.

These inventions are likely to cause impact/disruption on the Road-maps of companies like Eutelsat OneWeb/SpaceX/Viasat. For a notable example, please see attached file 092__USPTO_19_639,265_A_High-Radix_and_Parametric_Satellite_Communication_System.pdf and specially USPTO Application # 19/639,265, titled: "A High-Radix and Parametric Satellite Communication System".

Importantly, I have already granted a perpetual, no-fee use license to the US DoD (please see 00__Department-of-Defense__The-Heidi-Shyu-License-Grant.pdf).

I am attaching the patent applications filed with the USPT to this email as PDF file "01__ISBN-978-1-97-148129-6__Portfolio-of-Patent-Applications-Submitted-to-the-USPTO_v2.1998.61.pdf".

I require an aggressive IP litigation and strategy team to protect these assets. A sophisticated technical adversary, backed by a coordinated enterprise with state-level resources, is currently taking active steps to misappropriate and implement these architectures.

Because this systemic IP theft involves severe breaches of fiduciary and federal statutes, I have initiated parallel whistleblower disclosures with federal authorities. This includes formal criminal referrals submitted to Hon. Colin McDonald (National Fraud Enforcement Division) and Hon. Cody Matthew Herche (Trade Fraud Task Force) at the DOJ. The documentation of these federal filings is attached for your review.

I would welcome the opportunity to discuss how your firm might lead the protection and monetization of this portfolio.

Respectfully,

Reinaldo J. Aguiar Marcano
Forensic Systems Architect

LEGAL NOTICE OF POTENTIAL INFRINGEMENT OF INTELLECTUAL PROPERTY

SENT VIA ELECTRONIC MAIL

Legal Department
Microsoft Corporation
One Microsoft Way
Redmond, WA 98052-6399
buscond@microsoft.com

From:
Reinaldo J. Aguiar Marcano
Managing Director, Legal

Date: May 7, 2026

Subject: Notice of Potential Infringement of U.S. Patent Applications and Notice of Actual Knowledge

To the Legal Department of Microsoft Corporation,

This letter serves as a formal notice of potential infringement of several of my U.S. patent applications. It has come to my attention that activities associated with Microsoft Corporation ("Microsoft"), particularly concerning its extensive software, cloud computing, and hardware operations, may be infringing upon my intellectual property rights.

The following U.S. patent applications, among others in my portfolio, are believed to be relevant to these activities:

- **USPTO Application No. 19/560,038:** Optical Computing Architecture and System
- **USPTO Application No. 19/562,845:** A Physically Disaggregated Computing System
- **USPTO Application No. 19/658,570:** METHOD AND SYSTEM FOR GEOGRAPHICAL AND ORIENTATION-BASED ENCRYPTION SEEDS
- **USPTO Application No. 19/559,849:** METHOD AND SYSTEM FOR IDENTIFYING ENCRYPTED TRAFFIC BY INJECTING STEGANOGRAPHIC ANCHORS

These applications describe novel methods and systems for optical computing architectures, physically disaggregated computing, geographical and orientation-based encryption, and identifying encrypted traffic via steganographic anchors. Given Microsoft's broad involvement in software, cloud services (e.g., Azure), and hardware, there is a strong basis to believe that technologies infringing upon one or more of these pending patents are being employed.

Furthermore, please be advised that attached to this email is the complete portfolio of my inventions, which has also been published in a printed book under the title "ISBN 9781971481296 Portfolio of

Patent Applications Submitted to the USPTO." This transmission constitutes a formal Notice of Actual Knowledge of the entire contents of the attached book and the patent applications contained therein.

This letter serves as a good faith effort to inform Microsoft of my intellectual property rights. I am open to discussing licensing terms for the use of my patented technologies.

I expect a prompt and substantive response to this notice within fifteen (15) business days. Failure to respond may result in further legal action to protect my intellectual property rights.

This letter is not a complete statement of my rights in connection with this matter and is without prejudice to any of my rights and remedies, all of which are hereby expressly reserved.

Sincerely,

s/Reinaldo Aguiar Marcano/

REGISTERED EMAIL™ | CERTIFIED DELIVERY

This is a Registered Email™ message from **RJ Aguiar JR.**.

Dear Mrs. Hill,

As a way of introduction, my name is Reinaldo Aguiar Marcano. I am the Principal at a firm focusing on Aerospace, Sat-Comm and Fleet-logistic technologies, and a former Managing Director at Goldman Sachs and Staff Engineer at Google.

I recently filed Whistleblower reports with the IRS, the OFAC, FinCEN and the SEC, and less than two weeks after, the entities I reported to these federal agencies triggered a retaliatory action against me, using the IRS as a tool of retaliation.

I am responding to these adverse actions using the channels within the IRS, the CRCO and the TIGTA, but I thought I wanted to bring this matter to your attention directly given that your office has a leadership role within the TIGTA. Please find my letter to the IRS with attachments that clearly show the anomalies surrounding these events.

Respectfully,

Reinaldo Aguiar Marcano
IRS Caller ID: 188337

Dear Ms. Sudol, Ms. Walsh, Mr. Paris, Mr. Stackhouse, Mr. Jimenez, Mr. Morris, Mr. Chapman, Ms. Lesser, Mr. Devarakonda, and Ms. Van Hoesen,

Re: International Defensive Publication "Be Water, Be Light" (ISBN: 978-1-97-148129-6); USPTO # 19/640,945, USPTO # 19/632,333, and USPTO # 19/559,873.

This letter serves as formal notice that a comprehensive portfolio of patent applications has been released as a defensive publication to establish definitive prior art in the fields of **asynchronous secure communication**, **organizational information**

leak-proofing, and **attributed corporate influence detection**. This technical record, titled *"Be Water, Be Light: Portfolio of Patent Applications Submitted to the USPTO"* (ISBN: 978-1-97-148129-6), documents a new architecture designed to overcome the fundamental security and data-integrity bottlenecks of modern Electronic Health Record (EHR) and financial systems.

1. Anchors for Technical Disclosure (Healthcare & PE Context)

The following patent applications, formally filed with the USPTO in early 2026, serve as technical anchors for this notice, providing solutions for the secure management of PHI and the transparent tracking of corporate control:

- **USPTO # 19/640,945: Asynchronous Secure Communication with Post-Hoc Key Derivation.** Discloses a method for secure communication that inverts the traditional cryptographic paradigm, asynchronously transmitting data components before the final key derivation to increase resilience against Man-in-the-Middle (MITM) attacks during PHI exchange.
- **USPTO # 19/559,873: Method and System for Information Leak-Proofing of Organizations.** Defines a data analysis engine that maps the "blast radius" of sensitive information and calculates a "potential damage score" for internal nodes to proactively mitigate insider threats in massive EHR databases.
- **USPTO # 19/559,958: Method and System for Detecting Data Transposition and Unauthorized Data Permutation.** Provides a "permutation signature" system to protect against subtle data manipulation where record sequence is maliciously altered to change overall medical or financial meaning.
- **USPTO # 19/632,333: System and Method for Attributed Control Aggregation and Influence Detection.** Discloses a resilient "Identity Fingerprint" and "Influence Smearing" algorithm designed to traverse corporate ownership graphs and attribute direct/indirect control, piercing the corporate veil in complex private equity structures.

2. Formal Notification to the European Patent Office (EPO)

On April 7, 2026, a formal notification was delivered to the **European Patent Office (EPO)**. I have requested that this 721-page specification be indexed as **Non-Patent Literature (NPL)** within **Technical Clusters G06F and H04L**. This ensures examiners cite this work as prior art for any future applications related to secure data-link protocols, ownership tracing algorithms, or organizational risk modeling.

3. Strategic National Security Status and U.S. Government License

Recognizing the foundational nature of these inventions for national infrastructure and data security, I have granted a **perpetual, worldwide, no-fee license** to the **United States Federal Government**. This grant was formally communicated to the **Honorable Heidi Shyu**, Under Secretary of Defense for Research and Engineering, designating this IP as a **strategic national asset**.

4. Implications for Product Roadmaps

This disclosure establishes an undeniable public record that removes "plausible deniability" for entities attempting to patent these security and forensic technologies for exclusive benefit. Major international legal representatives, including those at **Simpson Thacher**, **Fish & Richardson**, and **Jenner & Block**, are hereby notified to ensure this technical record is considered during current and future patent filing cycles.

I remain available to provide the full high-resolution digital version of record to your technical and legal reviewers upon request.

Respectfully,
Reinaldo J. Aguiar Marcano, Forensic Systems Architect

Dear Mr. Johnson, Mr. Jablonsky, Mr. Schoellhorn, Mr. Eisenhut, Mr. Marshall, Mr. Murphy, Mr. O'Toole, Mr. Lin, Mr. Kargieman, Mr. Nash, Mr. Moore, and Mr. Davis,

This letter serves as formal notice that a comprehensive portfolio of patent applications has been released as a defensive publication to establish definitive prior art in the fields of **satellite vision systems**, **orbital computer vision**, and **optical ground-to-space communications**. This technical record, titled *"Be Water, Be Light: Portfolio of Patent Applications Submitted to the USPTO"* (ISBN: 978-1-97-148129-6), has been accepted for publication in the *International Journal of Law, Ethics, and Technology*.

1. Anchors for Technical Disclosure The following patent applications, formally filed with the USPTO between March 6 and March 9, 2026, serve as the technical anchors for this notice:

- **USPTO # 19/559,745: System and Method for Covert Communication Using Arrangements of Satellite-Observable, Distinctively Colored Objects.** This invention utilizes a novel form of visual steganography, encoding messages by physically arranging movable objects on the Earth's surface to be read via satellite imagery using computer vision to extract intelligence from orbital photography.
- **USPTO # 19/559,656: Method for Covert Communication via Satellite Vision Systems.** Discloses a system for creating large-scale visual patterns on the Earth's surface timed to activate only during the brief window when a specific imaging satellite is passing over.
- **USPTO # 19/641,125: A System and Method for High-Radix Parametric Optical Ground-to-Space Communication.** Defines a high-bandwidth optical downlink and uplink architecture for ground-to-space data exchange.
- **USPTO # 19/639,265: A High-Radix and Parametric Satellite Communication System.** Architecture for satellite-based data transmission utilizing high-radix encoding to maximize throughput.
- **USPTO # 19/559,972: Method and System for Communication via Passive Reflection from Non-Cooperative Orbiting Objects.** A computational engine that predicts the trajectory of orbiting objects to use them as passive reflectors for directed radio signals.

2. Formal Notification to the European Patent Office (EPO) On April 7, 2026, a formal notification was delivered to the **European Patent Office (EPO)**, specifically addressed to Vice President Rowan and Director Philpott of Directorate-General 1. I have formally requested that this 721-page specification be indexed as **Non-Patent Literature (NPL)** within **Technical Clusters G06F and H04L**. This ensures examiners cite this work as prior art during the examination of any applications related to satellite imaging payloads, optical buses, or orbital trajectory computation.

3. Strategic National Security Status and U.S. Government License Recognizing the foundational nature of these inventions for national defense and orbital security, I have granted a **perpetual, worldwide, no-fee license** to the **United States Federal Government**. This grant was formally communicated to the **Honorable Heidi Shyu**, Under Secretary of Defense for Research and Engineering, designating this IP as a **strategic national asset** to ensure the United States has an unencumbered right to this technology.

4. Implications for Product Roadmaps This disclosure has significant implications for the product roadmaps of companies operating in the Earth observation and satellite intelligence sectors. Major international legal representatives, including those specializing in space and satellite regulation, have been notified to ensure this technical record is considered during current and future patent filing cycles.

I remain available to provide the full high-resolution digital version of record to your technical and legal reviewers upon request.

Respectfully,
Reinaldo J. Aguiar Marcano
Forensic Systems Architect

Good Morning Mr. Carpenter and Mr. Van De Weert,

My name is Reinaldo Aguiar. I am a former Staff Software Engineer at Google and a former Managing Director at Goldman Sachs.

I am seeking specialized legal representation for a comprehensive intellectual property portfolio consisting of 47 patent applications currently filed with the USPTO. The portfolio (attached) centers on foundational systems for High-Radix architectures (highly relevant to current CPU, AI and InfiniBand networking infrastructures), and Parametric Encoding applied to computing, and also relevant to satellite and cellular communications.

These inventions are likely to cause impact/disruption on the Road-maps of companies like Huawei, Intel and NVIDIA.

I am attaching the patent applications filed with the USPT to this email as PDF file "01__ISBN-978-1-97-148129-6__Portfolio-of-Patent-Applications-Submitted-to-the-USPTO_v2.1998.61.pdf".

I require an aggressive IP litigation and strategy team to protect these assets. A sophisticated technical adversary, backed by a coordinated enterprise with state-level resources, is currently taking active steps to misappropriate and implement these architectures.

Because this systemic IP theft involves severe breaches of fiduciary and federal statutes, I have initiated parallel whistleblower disclosures with federal authorities. This includes formal criminal referrals submitted to Hon. Colin McDonald (National Fraud Enforcement Division) and Hon. Cody Matthew Herche (Trade Fraud Task Force) at the DOJ. The documentation of these federal filings is attached for your review.

I am contacting you specifically because your previous tenure at the DOJ, combined with your judicial experience in Ohio, provides the exact jurisdictional and federal expertise required to navigate high-stakes IP litigation that overlaps with ongoing federal criminal scrutiny.

I would welcome the opportunity to discuss how your firm might lead the protection and monetization of this portfolio.

Respectfully,

Reinaldo J. Aguiar Marcano

RE: URGENT PETITION FOR INVESTIGATION: Systemic Infiltration of IRS Memphis/Austin Branches by Foreign Intelligence Operatives; Retaliation Against Whistleblower Reinaldo J. Aguiar Marcano.

Honorable Chairs and Subcommittee Members:

This is a formal petition for an immediate Congressional investigation into a catastrophic security breach at the Internal Revenue Service (IRS). As detailed in the attached **Declaration D132**, there is forensic evidence that the IRS notice-generation queue has been compromised by the Venezuelan Army Intelligence and a transnational racketeering (RICO) enterprise.

I. The 24-Hour Timeline: A Physical and Logical Impossibility
On April 13, 2026, the IRS Memphis branch generated **Notice CP14** demanding a duplicative assessment of $75,067.62 from me. Within 24 hours—before the physical letter could have been delivered via mail to my residence in Katy, Texas—I was warned by a source physically located in Venezuela and embedded in the **Venezuelan Army Intelligence** that an IRS action was being triggered to freeze my bank accounts and silence my whistleblowing.

I verified this "Impossible Knowledge" by logging into the IRS portal, where I found the notice. It is physically impossible for a foreign military officer in Venezuela to know the contents of an unmailed IRS notice from Tennessee unless the **IRS's technical substrate** has been fully compromised by a hostile foreign power.

II. Retaliation Against a Disruptive Innovator
This administrative strike follows my filing of 50 foundational patent applications (e.g., **19/640,945** and **19/639,219**) that threaten the economic dominance of the "Big Three" aggregators (BlackRock, Vanguard, State Street). The IRS Notice CP14 contains a manual intervention code (**"18H"**) indicating an override by the Error Resolution System (ERS). This override occurred despite my previous payment of $442,531.00 against a $431,263.00 self-assessment, creating a "manufactured" debt designed to trigger an automated account freeze.

III. Request for Congressional Action
Under the mandate of the **Subcommittee on Delivering on Government Efficiency (DOGE)** to expose "abuse in government systems", I plead for a subpoena of the IRS system access logs for TIN: XXX-XX-2502. We must determine how foreign intelligence obtained visibility into internal IRS enforcement workflows before the taxpayer was served.

This is not a tax dispute; it is a counterintelligence crisis and a violation of **IRC § 6103** return confidentiality on a national scale.

For reference, I am also attaching to this email the letter I faxed to the IRS in response to their notice CP14 before I actually received it by mail.

Respectfully,
Reinaldo J. Aguiar Marcano
Managing Director at https://SCOTXwatch.org/
Former Managing Director, Goldman Sachs and Staff Software Engineer, Google.

Good afternoon Mr. Waldrop,

My name is Reinaldo Aguiar. I am a former Staff Software Engineer at Google and a former Managing Director at Goldman Sachs.

I am seeking specialized legal representation for a comprehensive intellectual property portfolio consisting of 47 patent applications currently filed with the USPTO. The portfolio (attached) centers on foundational systems for High-Radix architectures (highly relevant to current CPU, AI and InfiniBand networking infrastructures), and Parametric Encoding applied to computing, and also relevant to satellite and cellular communications.

These inventions are likely to cause impact/disruption on the Road-maps of companies like Huawei, Lucent Technologies, Motorola and Telefonaktiebolaget LM Ericsson, for a notable example, please see attached file 92__USPTO_19_639,255_A_High-Radix_and_Parametric_Cellular_Communication_System.pdf.

I am also attaching all the other patent applications filed with the USPTO to this email as PDF file "01__ISBN-978-1-97-148129-6__Portfolio-of-Patent-Applications-Submitted-to-the-USPTO_v2.1998.61.pdf".

I require an aggressive IP litigation and strategy team to protect these assets. A sophisticated technical adversary, backed by a coordinated enterprise with state-level resources, is currently taking active steps to misappropriate and implement these architectures.

Because this systemic IP theft involves severe breaches of fiduciary and federal statutes, I have initiated parallel whistleblower disclosures with federal authorities. This includes formal criminal referrals submitted to Hon. Colin McDonald (National Fraud Enforcement Division) and Hon. Cody Matthew Herche (Trade Fraud Task Force) at the DOJ. The documentation of these federal filings is attached for your review.

I am contacting you specifically because I heard from a friend that your firm has key players that had experience working at the DOJ, which would provide the exact jurisdictional and federal expertise required to navigate high-stakes IP litigation that overlaps with ongoing federal criminal scrutiny.

I would welcome the opportunity to discuss how your firm might lead the protection and monetization of this portfolio.

Respectfully,

Reinaldo J. Aguiar Marcano

Good evening Mr. Verrilli,

My name is Reinaldo Aguiar. I am a former Staff Software Engineer at Google and a former Managing Director at Goldman Sachs.

I am seeking specialized legal representation for a comprehensive intellectual property portfolio consisting of 47 patent applications currently filed with the USPTO. The portfolio (attached) centers on foundational systems for High-Radix architectures (highly relevant to current CPU, AI and InfiniBand networking infrastructures), and Parametric Encoding applied to computing, and also relevant to satellite and cellular communications.

These inventions are likely to cause impact/disruption on the Road-maps of companies like UBER Technologies, eBay and Amazon. For a notable example, please see attached file 00__Letter-to-Uber-and-Emil-Michael.pdf and specially USPTO Application #19/559,608, titled: "A Sharded, Compression-Efficient Method for Storing and Transmitting Geographical Data and its Application to a Secure Transactional Ledger".

I am also attaching all the other patent applications filed with the USPTO to this email as PDF file "01__ISBN-978-1-97-148129-6__Portfolio-of-Patent-Applications-Submitted-to-the-USPTO_v2.1998.61.pdf".

I require an aggressive IP litigation and strategy team to protect these assets. A sophisticated technical adversary, backed by a coordinated enterprise with state-level resources, is currently taking active steps to misappropriate and implement these architectures.

Because this systemic IP theft involves severe breaches of fiduciary and federal statutes, I have initiated parallel whistleblower disclosures with federal authorities. This includes formal criminal referrals submitted to Hon. Colin McDonald (National Fraud Enforcement Division) and Hon. Cody Matthew Herche (Trade Fraud Task Force) at the DOJ. The documentation of these federal filings is attached for your review.

I am contacting you specifically because of your previous experience as U.S. Solicitor General, which would provide the exact jurisdictional and federal expertise required to navigate high-stakes IP litigation that overlaps with ongoing federal criminal scrutiny.

I would welcome the opportunity to discuss how your firm might lead the protection and monetization of this portfolio.

Respectfully,

Reinaldo J. Aguiar Marcano

This letter serves as formal notice that a comprehensive portfolio of patent applications has been released as a defensive publication to establish definitive prior art in the fields of **forensic corporate auditing**, **attributed control detection**, and **asynchronous secure communication**. This technical record, titled **"Be Water, Be Light: Portfolio of Patent Applications Submitted to the USPTO"** (ISBN: 978-1-97-148129-6), has been accepted for publication in the *International Journal of Law, Ethics, and Technology*.

1. Anchors for Technical Disclosure (Tax Litigation Context)

The following patent applications, formally filed with the USPTO in early 2026, serve as technical anchors for this notice, providing foundational solutions for investigative tax auditing and secure litigation data management:

- **USPTO # 19/632,333: System and Method for Attributed Control Aggregation and Influence Detection.** Discloses a resilient "Identity Fingerprint" and "Influence Smearing" algorithm designed to traverse corporate ownership graphs and attribute direct/indirect control. This technology is a foundational tool for **piercing the corporate veil** and identifying "real interest" holders in complex, multi-layered shell structures.
- **USPTO # 19/640,945: Asynchronous Secure Communication with Post-Hoc Key Derivation.** Provides a cryptographic method for the secure exchange of sensitive litigation files. By decoupling data transmission from key derivation, this protocol ensures that high-value tax evidence and client communications remain resilient against interception even in contested digital environments.
- **USPTO # 19/559,957: Method and System for Power Holder Analysis in Social Networks.** Defines an analysis engine that identifies "indispensable bottlenecks" and centers of control within organizational dependency graphs, enabling forensic auditors to locate the true decision-makers within evasive corporate structures.

2. Formal Notification to the European Patent Office (EPO)

On April 7, 2026, a formal notification was delivered to the **European Patent Office (EPO)**. I have requested that this 721-page specification be indexed as **Non-Patent Literature (NPL)** within **Technical Clusters G06F and H04L**. This ensures that EPO examiners cite this work as prior art during the examination of any future applications related to ownership tracing algorithms or secure data link layer protocols.

3. Strategic National Security Status and U.S. Government License

Recognizing the foundational nature of these inventions for investigative auditing and national security, I have granted a **perpetual, worldwide, no-fee license** to the **United States Federal Government**. This grant was formally communicated to the **Honorable Heidi Shyu**, Under Secretary of Defense for Research and Engineering, designating this IP as a **strategic national asset**.

4. Implications for Litigation and Auditing Practice

This disclosure establishes an undeniable public record that removes "plausible deniability" for entities attempting to patent these forensic and security technologies for exclusive benefit. As a leading firm in tax controversy and investigative litigation, Chamberlain Hrdlicka is hereby notified to ensure this technical record is considered during current and future patent filing or client advisory cycles.
I remain available to provide the full high-resolution digital version of record to your technical and legal reviewers upon request.

Respectfully,

Reinaldo J. Aguiar Marcano

Date: May 7, 2026

Subject: Notice of Potential Infringement of U.S. Patent Applications and Notice of Actual Knowledge

Dear Mr. Zapolsky,

This letter serves as a formal notice of potential infringement of several of my U.S. patent applications. It has come to my attention that activities associated with Amazon.com, Inc. ("Amazon"), particularly concerning its delivery trucks and the store located at Brookfield Place in New York City, may be infringing upon my intellectual property rights.

The following U.S. patent applications, among others in my portfolio, are believed to be relevant to these activities:

- **USPTO Application No. 19/559,745:** SYSTEM AND METHOD FOR COVERT COMMUNICATION USING ARRANGEMENTS OF SATELLITE-OBSERVABLE, DISTINCTIVELY COLORED OBJECTS
- **USPTO Application No. 19/559,959:** METHOD AND SYSTEM FOR COVERT MANIPULATION OF A SUPPLY CHAIN
- **USPTO Application No. 19/560,069:** Business Method for Dual-Purpose Logistics Networks
- **USPTO Application No. 19/571,566:** METHOD AND SYSTEM FOR DE-ANONYMIZING RADIO FREQUENCY SIGNALS VIA A DISTRIBUTED SENSOR ARRAY
- **USPTO Application No. 19/638,466:** SYSTEM FOR SECURE COMMUNICATION USING COVERT SIDE-CHANNELS EMBEDDED IN A HIGH-CARDINALITY PARALLEL DATA STREAM
- **USPTO Application No. 19/658,570:** METHOD AND SYSTEM FOR GEOGRAPHICAL AND ORIENTATION-BASED ENCRYPTION SEEDS

These applications describe novel methods and systems for covert communication, supply chain manipulation, dual-purpose logistics networks, de-anonymizing RF signals, secure communication via covert side-channels, and geographical/orientation-based encryption. Given the nature of Amazon's logistics and retail operations, there is a strong basis to believe that technologies infringing upon one or more of these pending patents are being employed.

Furthermore, please be advised that attached to this email is the complete portfolio of my inventions, which has also been published in a printed book under the title "ISBN 9781971481296 Portfolio of Patent Applications Submitted to the USPTO." This transmission constitutes a formal Notice of Actual Knowledge of the entire contents of the attached book and the patent applications contained therein.

This letter serves as a good faith effort to inform Amazon of my intellectual property rights. I am open to discussing licensing terms for the use of my patented technologies. As a condition of any such license, I would require that any infringing properties (e.g., delivery vehicles, store signage, or operational equipment) be clearly and publicly marked with the corresponding USPTO Patent Application number(s) or my name as the inventor. The marking must be placed in public view and occupy at least 3% of the visible surface of the property/vehicle.

I expect a prompt and substantive response to this notice within fifteen (15) business days. Failure to respond may result in further legal action to protect my intellectual property rights.

This letter is not a complete statement of my rights in connection with this matter and is without prejudice to any of my rights and remedies, all of which are hereby expressly reserved.

Sincerely,

s/Reinaldo Aguiar Marcano/

Good afternoon Mr. Patterson,

My name is Reinaldo Aguiar. I am a former Staff Software Engineer at Google and a former Managing Director at Goldman Sachs.

I am seeking specialized legal representation for a comprehensive intellectual property portfolio consisting of 47 patent applications currently filed with the USPTO. The portfolio (attached) centers on foundational systems for High-Radix architectures (highly relevant to current CPU, AI and InfiniBand networking infrastructures), and Parametric Encoding applied to computing, and also relevant to satellite and cellular communications.

These inventions are likely to cause impact/disruption on the Road-maps of companies like Huawei, Intel and NVIDIA.

I am attaching the patent applications filed with the USPT to this email as PDF file "01__ISBN-978-1-97-148129-6__Portfolio-of-Patent-Applications-Submitted-to-the-USPTO_v2.1998.61.pdf".

I require an aggressive IP litigation and strategy team to protect these assets. A sophisticated technical adversary, backed by a coordinated enterprise with state-level resources, is currently taking active steps to misappropriate and implement these architectures.

Because this systemic IP theft involves severe breaches of fiduciary and federal statutes, I have initiated parallel whistleblower disclosures with federal authorities. This includes formal criminal referrals submitted to Hon. Colin McDonald (National Fraud Enforcement Division) and Hon. Cody Matthew Herche (Trade Fraud Task Force) at the DOJ. The documentation of these federal filings is attached for your review.

I am contacting you specifically because your previous tenure at the DOJ, combined with your judicial experience in Ohio, provides the exact jurisdictional and federal expertise required to navigate high-stakes IP litigation that overlaps with ongoing federal criminal scrutiny.

I would welcome the opportunity to discuss how your firm might lead the protection and monetization of this portfolio.

Respectfully,

Reinaldo J. Aguiar Marcano
Forensic Systems Architect

RE: ACTUAL KNOWLEDGE OF PENDING PATENT CLAIMS (35 U.S.C. § 154(d)) REGARDING QUANTUM-CENTRIC SUPERCOMPUTING, DISAGGREGATED HYBRID ARCHITECTURES, AND THE AGUIAR MARCANO INTELLECTUAL PROPERTY PORTFOLIO

DATE: April 17, 2026

DEAR:

Mr. Krishna, Ms. Browdy, Mr. Nadella, and Mr. Nowbar,

This comprehensive technical and legal brief is served upon the executive leadership and chief legal officers of IBM Corporation and Microsoft Corporation to establish formal, legally binding actual notice.

As the architects of the world's most advanced classical and quantum computing infrastructures, your organizations are racing to achieve "utility-scale" quantum supremacy. We have closely monitored IBM's March 12, 2026 release of its "quantum-centric supercomputing" reference architecture, as well as Microsoft's recent unveiling of the Majorana 1 topological processor and its collaboration with the State of Maryland and the NSA to build the "Capital of Quantum" research center.

While your respective quantum processing units (QPUs)—whether superconducting transmons or topological Majorana zero modes—rely on differing physics, your overarching system architectures share a fatal legal vulnerability. The integration of these QPUs with classical CPUs and GPUs into unified, high-performance hybrid clouds fundamentally relies upon the proprietary claims of the

ISBN 9781971481296

Aguiar Marcano Intellectual Property Portfolio.

This portfolio comprises fifty-two (52) foundational patent applications formally executed and filed with the United States Patent and Trademark Office (USPTO).[1]

The primary objective of this document is to satisfy the strict requirements for "Actual Notice" pursuant to 35 U.S.C. § 154(d), thereby initiating the immediate accrual of provisional rights and the corresponding liability for reasonable royalties.[2]

I. IBM Corporation: The "Quantum-Centric Supercomputing" Blueprint

Target Operations: IBM Quantum, Qiskit v2.1, and the QCSC Reference Architecture

On March 12, 2026, IBM published a comprehensive blueprint detailing the integration of QPUs into modern supercomputing environments, explicitly showcasing how quantum hardware operates alongside co-located CPU and GPU clusters connected via low-latency interconnects (e.g., NVQLink, RDMA). This exact blueprint is legally encumbered by our portfolio.

- **A Physically Disaggregated Computing System (USPTO 19/562,845) & System for a Data Center Architecture with Functionally Segregated Resource Pools (USPTO 19/562,855):** IBM's multi-level hardware infrastructure specifically relies on isolating the quantum system (which requires cryogenic cooling and specialized ASICs for error correction) from the "partner scale-up" and "scale-out" classical GPU/CPU clusters. Our patents explicitly claim this architecture: a computing system where primary components are physically disaggregated into separate enclosures, functionally segregated by specialized infrastructure zones, and interconnected by an ultra-high-bandwidth data fabric.[1]
- **Method for Dynamic Composition of Bare-Metal Computing Resources (USPTO 19/562,853):** IBM's system orchestration layer utilizes tools like the Quantum Resource Management Interface (QRMI) and Slurm plugins to expose quantum resources as schedulable entities. This directly infringes upon our method for dynamically composing a logical, bare-metal computer from physically disaggregated pools of hardware resources on demand.[1]

II. Microsoft Corporation: Azure Quantum and Topological Scaling

Target Operations: Azure Quantum, Majorana 1 Processor, and Quantum-Classical Orchestration

Microsoft's roadmap hinges on scaling topological qubits and providing a hybrid developer environment through Azure Quantum and the Q# programming language.

- **Optical Computing Architecture and System (USPTO 19/560,038) & Massively Parallel**

ISBN 9781971481296

Optical Data Bus Architecture (USPTO 19/562,818): As Microsoft attempts to scale the Majorana 1 chip from a prototype to a system containing one million reliable qubits, the I/O bottleneck of moving classical control and error-correction data into and out of the dilution refrigerator becomes the primary physics barrier. Overcoming this requires abandoning serial electronics for massively parallel optical data fabrics. Any deployment of high-radix optical interconnects to bridge your topological cores with Azure's classical supercomputing backbone operates directly within our claimed hardware architecture.[1]

III. The National Security Imperative and Federal Defense License

Both IBM and Microsoft are primary contractors for the United States Department of Defense, the Department of Energy, and the intelligence community. Microsoft's recent "Capital of Quantum" initiative specifically highlights its proximity to and collaboration with the NSA.

You must be advised that within the legal text of these patent applications, the inventor has executed an irrevocable, perpetual, worldwide, no-fee license granting the United States Federal Government the right to utilize these inventions for all national defense purposes.[1] Consequently, while the U.S. government is immune from infringement under 28 U.S.C. § 1498, your unauthorized commercialization of these architectures for private enterprise cloud offerings (e.g., commercial Azure or IBM Cloud clients) constitutes unshielded infringement.

IV. Mandatory Due Diligence Protocols and Ultimatum

The statutory clock for the calculation of retroactive reasonable royalties commences immediately upon your receipt and actual knowledge of the published claims detailed herein. Ignorance of how your hybrid quantum-classical orchestration middleware and disaggregated hardware layouts synergize to infringe upon these overarching system-level claims is not a viable legal defense.

The executive leadership of each addressed organization is hereby directed to execute the following immediate remediation protocols:

1. **Initiation of FTO Audits:** You must immediately instruct your internal legal departments and outside IP counsel to cross-reference the fifty-two (52) applications within the Aguiar Marcano Portfolio against IBM's Quantum-Centric Supercomputing architecture and Microsoft's Azure Quantum hybrid workflows.

2. **Quarantine of Intersecting Architectures:** Any commercial deployment of disaggregated resource pools bridging QPUs and classical GPUs via high-bandwidth interconnects must be evaluated for immediate quarantine to mitigate ongoing commercial liability.

ISBN 9781971481296

We formally invite your respective legal departments to initiate a technical review of the cited USPTO applications. A formal response outlining your intended compliance audit, a presentation of non-infringement theories, or a request to discuss a commercial licensing framework is expected within thirty (30) business days of the transmission of this notice.

Govern yourselves accordingly.

Reinaldo Aguiar Marcano

Dear Mrs. Small,

My name is Reinaldo Aguiar. I am a former Staff Software Engineer at Google and a former Managing Director at Goldman Sachs.

I am seeking specialized legal representation for a comprehensive intellectual property portfolio consisting of 47 patent applications currently filed with the USPTO. The portfolio (attached) centers on foundational systems for High-Radix architectures (highly relevant to current CPU, AI and InfiniBand networking infrastructures), and Parametric Encoding applied to computing, and also relevant to satellite and cellular communications.

These inventions are likely to cause impact/disruption on the Road-maps of companies like Huawei, Intel and NVIDIA.

I am attaching the patent applications filed with the USPT to this email as PDF file "01__ISBN-978-1-97-148129-6__Portfolio-of-Patent-Applications-Submitted-to-the-USPTO_v2.1998.61.pdf".

I require an aggressive IP litigation and strategy team to protect these assets. A sophisticated technical adversary, backed by a coordinated enterprise with state-level resources, is currently taking active steps to misappropriate and implement these architectures.

Because this systemic IP theft involves severe breaches of fiduciary and federal statutes, I have initiated parallel whistleblower disclosures with federal authorities. This includes formal criminal referrals submitted to Hon. Colin McDonald (National Fraud Enforcement Division) and Hon. Cody Matthew Herche (Trade Fraud Task Force) at the DOJ. The documentation of these federal filings is attached for your review.

I am contacting you specifically because your previous tenure at the DOJ provides the exact jurisdictional and federal expertise required to navigate high-stakes IP litigation that overlaps with ongoing federal criminal scrutiny.

I would welcome the opportunity to discuss how your firm might lead the protection and monetization of this portfolio.

Respectfully,

Reinaldo J. Aguiar Marcano
Forensic Systems Architect

Good afternoon Mr. Fibbe & Lynn,

My name is Reinaldo Aguiar. I am a former Staff Software Engineer at Google and a former Managing Director at Goldman Sachs.

I am seeking specialized legal representation for a comprehensive intellectual property portfolio consisting of 47 patent applications currently filed with the USPTO. The portfolio (attached) centers on foundational systems for High-Radix architectures (highly relevant to current CPU, AI and InfiniBand networking infrastructures), and Parametric Encoding applied to computing, and also relevant to satellite and cellular communications.

These inventions are likely to cause impact/disruption on the Road-maps of companies like Huawei, SpaceX, Viasat, etc (see 91__USPTO_19_639,265_A_High-Radix_and_Parametric_Satellite_Communication_System.pdf attached to this email)

I am attaching the patent applications filed with the USPT to this email as PDF file "01__ISBN-978-1-97-148129-6__Portfolio-of-Patent-Applications-Submitted-to-the-USPTO_v2.1998.61.pdf".

I require an aggressive IP litigation and strategy team to protect these assets. A sophisticated technical adversary, backed by a coordinated enterprise with state-level resources, is currently taking active steps to misappropriate and implement these architectures.

Because this systemic IP theft involves severe breaches of fiduciary and federal statutes, I have initiated parallel whistleblower disclosures with federal authorities. This includes formal criminal referrals submitted to Hon. Colin McDonald (National Fraud Enforcement Division) and Hon. Cody Matthew Herche (Trade Fraud Task Force) at the DOJ. The documentation of these federal filings is attached for your review.

Mr. Fibbe: I am contacting you specifically because your previous tenure at the DOJ provides the exact jurisdictional and federal expertise required to navigate high-stakes IP litigation that overlaps with ongoing federal criminal scrutiny.

I would welcome the opportunity to discuss how your firm might lead the protection and monetization of this portfolio.

Respectfully,

Reinaldo J. Aguiar Marcano

Dear Mr. Karp,

My name is Reinaldo Aguiar. I am a former Staff Software Engineer at Google and a former Managing Director at Goldman Sachs.

I am seeking specialized legal representation for a comprehensive intellectual property portfolio consisting of 47 patent applications currently filed with the USPTO. The portfolio (attached) centers on foundational systems for High-Radix architectures (highly relevant to current CPU, AI and InfiniBand networking infrastructures), and Parametric Encoding applied to computing, and also relevant to satellite and cellular communications.

These inventions are likely to cause impact/disruption on the Road-maps of companies like Huawei, Intel and NVIDIA, which are prominent Sponsors of Sporting events **(like the World Cup 2026)**.

I am attaching the patent applications filed with the USPT to this email as PDF file "01__ISBN-978-1-97-148129-6__Portfolio-of-Patent-Applications-Submitted-to-the-USPTO_v2.1998.61.pdf".

I require an aggressive IP litigation and strategy team to protect these assets. A sophisticated technical adversary, backed by a coordinated enterprise with state-level resources, is currently taking active steps to misappropriate and implement these architectures. **I believe one of the prominent individuals in this network is County Judge KP George, currently on trial for Money Laundering. This is relevant because there are important contracts in this geographical area related to Harris County hosting some events for the World Cup 2026.**

Because this systemic IP theft involves severe breaches of fiduciary and federal statutes, I have initiated parallel whistleblower disclosures with federal authorities. This includes formal criminal referrals submitted to Hon. Colin McDonald (National Fraud Enforcement Division) and Hon. Cody Matthew Herche (Trade Fraud Task Force) at the DOJ. The documentation of these federal filings is attached for your review.

I am contacting you specifically because you have in your staff Mr. William (Bill) Burck (Former Deputy Counsel to the President and Special Asst. US Attorney). I believe his previous tenure at the DOJ provides the exact jurisdictional and federal expertise required to navigate high-stakes IP litigation that overlaps with ongoing federal criminal scrutiny.

I would welcome the opportunity to discuss how your firm might lead the protection and monetization of this portfolio.

Respectfully,

Reinaldo J. Aguiar Marcano
Forensic Systems Architect
Former Managing Director, Goldman Sachs | Former Staff Engineer, Google

Good Morning Mr. Cordery,

My name is Reinaldo Aguiar. I am a former Staff Software Engineer at Google and a former Managing Director at Goldman Sachs.

I am seeking specialized legal representation for a comprehensive intellectual property portfolio consisting of 47 patent applications currently filed with the USPTO. The portfolio (attached) centers on foundational systems for High-Radix architectures (highly relevant to current CPU, AI and InfiniBand networking infrastructures), and Parametric Encoding applied to computing, and also relevant to satellite and cellular communications.

These inventions are likely to cause impact/disruption on the Road-maps of companies like Eutelsat OneWeb/SpaceX/Viasat. For a notable example, please see attached file 092__USPTO_19_639,265_A_High-Radix_and_Parametric_Satellite_Communication_System.pdf and specially USPTO Application # 19/639,265, titled: "A High-Radix and Parametric Satellite Communication System".

Importantly, I have already granted a perpetual, no-fee use license to the US DoD (please see 00__Department-of-Defense__The-Heidi-Shyu-License-Grant.pdf).

I am attaching the patent applications filed with the USPT to this email as PDF file "01__ISBN-978-1-97-148129-6__Portfolio-of-Patent-Applications-Submitted-to-the-USPTO_v2.1998.61.pdf".

I require an aggressive IP litigation and strategy team to protect these assets. A sophisticated technical adversary, backed by a coordinated enterprise with state-level resources, is currently taking active steps to misappropriate and implement these architectures.

Because this systemic IP theft involves severe breaches of fiduciary and federal statutes, I have initiated parallel whistleblower disclosures with federal authorities. This includes formal criminal referrals submitted to Hon. Colin McDonald (National Fraud Enforcement Division) and Hon. Cody Matthew Herche (Trade Fraud Task Force) at the DOJ. The documentation of these federal filings is attached for your review.

I would welcome the opportunity to discuss how your firm might lead the protection and monetization of this portfolio.

Respectfully,

Reinaldo J. Aguiar Marcano
Forensic Systems Architect

This Registered Receipt™ email is verifiable proof of your Registered Email™ transaction. It contains:

1. An official time stamp.
2. Proof that your message was sent and to whom it was sent.
3. Proof that your message was delivered to its addressees or their authorized electronic agents.
4. Proof of the content of your original message and all of its attachments.

Note: By default, RPost does not retain a copy of your email or this receipt and you should not rely on the information above until the receipt is verified by the RMail system. Keep this email and its attachment in place for your records. General terms and conditions are available at Legal Notice. RMail services are patented, using RPost patented technologies, including US patents 8209389, 8224913, 8468199, 8161104, 8468198, 8504628, 7966372, 6182219, 6571334 and other US and non-US patents listed at RPost Communications.

Dear Mr. Beckley,

My name is Reinaldo Aguiar. I am a former Staff Software Engineer at Google and a former Managing Director at Goldman Sachs.

I am seeking specialized legal representation for a comprehensive intellectual property portfolio consisting of 47 patent applications currently filed with the USPTO. The portfolio (attached) centers on foundational systems for High-Radix architectures (highly relevant to current CPU, AI and InfiniBand networking infrastructures), and Parametric Encoding applied to computing, and also relevant to satellite and cellular communications.

I am attaching the patent applications filed with the USPT to this email as PDF file "01__ISBN-978-1-97-148129-6__Portfolio-of-Patent-Applications-Submitted-to-the-USPTO_v2.1998.61.pdf".

I require an aggressive IP litigation and strategy team to protect these assets. A sophisticated technical adversary, backed by a coordinated enterprise with state-level resources, is currently taking active steps to misappropriate and implement these architectures.

Because this systemic IP theft involves severe breaches of fiduciary and federal statutes, I have initiated parallel whistleblower disclosures with federal authorities. This includes formal criminal referrals submitted to Hon. Colin McDonald (National Fraud Enforcement Division) and Hon. Cody Matthew Herche (Trade Fraud Task Force) at the DOJ. The documentation of these federal filings is attached for your review.

I am contacting you specifically because your previous tenure at the DOJ, combined with your judicial experience in Ohio, provides the exact jurisdictional and federal expertise required to navigate high-stakes IP litigation that overlaps with ongoing federal criminal scrutiny.

I would welcome the opportunity to discuss how your firm might lead the protection and monetization of this portfolio.

Respectfully,

Reinaldo J. Aguiar Marcano
Forensic Systems Architect

Good morning Mrs. Addleman and Mr. Breaux,

My name is Reinaldo Aguiar. I am a former Staff Software Engineer at Google and a former Managing Director at Goldman Sachs.

I am seeking specialized legal representation for a comprehensive intellectual property portfolio consisting of 47 patent applications currently filed with the USPTO. The portfolio (attached) centers on foundational systems for High-Radix architectures (highly relevant to current CPU, AI and InfiniBand networking infrastructures), and Parametric Encoding applied to computing, and also relevant to satellite and cellular communications.

I am attaching the patent applications filed with the USPT to this email as PDF file "01__ISBN-978-1-97-148129-6__Portfolio-of-Patent-Applications-Submitted-to-the-USPTO_v2.1998.61.pdf".

I require an aggressive IP litigation and strategy team to protect these assets. A sophisticated technical adversary, backed by a coordinated enterprise with state-level resources, is currently taking active steps to misappropriate and implement these architectures.

Because this systemic IP theft involves severe breaches of fiduciary and federal statutes, I have initiated parallel whistleblower disclosures with federal authorities. This includes formal criminal referrals submitted to Hon. Colin McDonald (National Fraud Enforcement Division) and Hon. Cody Matthew Herche (Trade Fraud Task Force) at the DOJ. The documentation of these federal filings is attached for your review.

I am contacting you specifically because your previous tenure at the DOJ, combined with your judicial experience in Ohio, provides the exact jurisdictional and federal expertise required to navigate high-stakes IP litigation that overlaps with ongoing federal criminal scrutiny.

I would welcome the opportunity to discuss how your firm might lead the protection and monetization of this portfolio.

Respectfully,

Reinaldo J. Aguiar Marcano
Forensic Systems Architect
