From:postmaster@mta21.r1.rpost.net:Hello, this is the mail server on mta21.r1.rpost.net. I am sending you this message to in form you on the delivery status of a message you previously sent. Immediately below you will find a list of the affected recipie nts; also attached is a Delivery Status Notification (DSN) report in standard format, as well as a copy of the original message. delivery failed; will not continue trying

From:postmaster@dallastxgov.onmicrosoft.com:Delivery has failed to these recipients or groups: police.chief@dpd.dallascityh all.com Your message wasn't delivered. Despite repeated attempts to deliver your message, the recipient's email system refus ed to accept a connection from your email system. Contact the recipient by some other means (by phone, for example) and a sk them to tell their email admin that it appears that their email system is refusing connections from your email server. Give th em the error details shown below. It's likely that the recipient's email admin is the only one who can fix this problem. For Email Admins No connection could be made because the target computer actively refused it. This usually results from trying to conn ect to a service that is inactive on the remote host - that is, one with no server application running. For more information and ti ps to fix this issue see this article: https://go.microsoft.co...[truncated]
