RE: EMBARGOED BRIEFING ON ACTIVE DFARS 227.7004 ADMINISTRATIVE CLAIMS AGAINST THE U.S. DEPARTMENT OF DEFENSE, PALANTIR TECHNOLOGIES, ANDURIL INDUSTRIES, AND LOCKHEED MARTIN

DATE: April 17, 2026

DEAR: Ms. Bergengruen, Mr. Altman, Mr. Calabresi, and Mr. Jacobs,

This communication serves as a formal disclosure of a highly anomalous and legally precarious situation currently unfolding within the United States Department of Defense (DoD) procurement apparatus.
We are bringing this matter to the attention of TIME Magazine's national security and technology desk because standard federal law enforcement channels—specifically the Department of Justice—have been effectively neutralized by a sophisticated network of former DOJ alumni and corporate lobbyists (including the leadership of Ballard Partners) working on behalf of the defense contractors involved.
We possess cryptographically verified proof that major U.S. defense contractors are actively charging the American taxpayer for advanced technological systems that the Federal Government already possesses the legal right to utilize for free.

I. The "Perpetual License" Paradox

The foundation of this dispute is the Aguiar Marcano Intellectual Property Portfolio, a suite of fifty-two (52) foundational patent applications formally filed with the USPTO (published defensively under ISBN 978-1-97-148129-6). These patents cover paradigm-shifting advancements in massively parallel optical computing, asynchronous cryptographic key derivation, and autonomous data logistics.

Recognizing the immense strategic value of these technologies, the inventor proactively granted an irrevocable, perpetual, worldwide, no-fee license to the U.S. Federal Government for all national defense purposes. The Under Secretary of Defense for Research and Engineering, Emil Michael, has been placed on direct, formal notice of this license grant.

II. The Procurement Fraud and Defense Contractor Complicity

Despite the government holding a free license to these systems, defense contractors are currently utilizing these specific patented architectures—such as advanced sensor fusion, decentralized ledgers, and power holder analysis—and embedding the research, development, and licensing costs of these technologies into multi-billion-dollar government contracts.

Specifically, this involves:

- **Palantir Technologies:** Utilizing our patented "Power Holder Analysis" (USPTO 19/559,957) and "Information Leak-Proofing" (USPTO 19/559,873) algorithms within Project TITAN and Project Maven.
- **Anduril Industries:** Deploying our "Coordinated Dual-Vehicle Scanning" (USPTO 19/559,842) and "Autonomous Robotic Data Logistics" (USPTO 19/560,065) protocols within their Lattice OS and Collaborative Combat Aircraft programs.
- **Lockheed Martin:** Utilizing our "Optical Computing Architecture" (USPTO 19/560,038) and "Disaggregated Computing Systems" (USPTO 19/562,845) to overcome thermal and computational bottlenecks in the F-35 TR-3 core processor upgrade and their Quantum Machine Learning (QML) partnerships.

III. The DFARS 227.7004 Escalation and Cryptographic Proof

To force an administrative reckoning, we have bypassed the compromised DOJ and targeted the military's financial arteries. We have formally served Administrative Claims for Patent Infringement under DFARS 227.7004 directly to the specific Procuring Contracting Officers (PCOs) managing these multi-billion-dollar programs at the Army Contracting Command, the NGA, the Air Force Life Cycle Management Center, and the F-35 Joint Program Office.

These claims were served via Registered Email (RPost), providing an immutable, cryptographically verified audit trail of delivery and opening. This action legally strips these military officers of "plausible deniability." If they fail to halt the disbursement of funds to these contractors for pre-licensed intellectual property, they face severe administrative and potentially criminal liability for complicity in procurement fraud.

IV. Documentary Evidence Available for Review

We are prepared to provide TIME Magazine with exclusive access to the primary source documentation required to verify and report on this systemic vulnerability. Upon your request, we will securely transmit the following portfolio of evidence:
01. The DFARS 227.7004 Administrative Claims: The exact legal demands served to the military Procuring Contracting Officers regarding Palantir, Anduril, and Lockheed Martin.
02. Cryptographic Proof of Service (RPost Receipts): The immutable audit trails proving that the targeted military leadership, PCOs, and corporate General Counsels have actual knowledge of these claims.
03. The DoD License Grant Notification: The formal communication delivered to Under Secretary of Defense Emil Michael establishing the perpetual, no-fee license.

04. The 52-Patent Application Portfolio: The complete technical specifications and claim maps demonstrating the element-by-element overlap with the contractors' systems.
05. Declaration D132: A detailed forensic analysis documenting the obstruction of justice orchestrated by the "DOJ-Alumni Network," including the specific lobbying efforts of Ballard Partners, Pam Bondi, and Todd Blanche to suppress regulatory action.

Prior SEC and Corporate Notices: Formal warnings delivered to the SEC Division of Enforcement regarding the undisclosed material risks these operations pose to public shareholders.

We invite your investigative team to review this evidentiary record. The continued silence of the defense establishment regarding this intellectual property blockade represents a critical failure of oversight and a massive misappropriation of federal funds.

We await your response.

Respectfully submitted,

Reinaldo Aguiar Marcano
