This is a Registered Email™ message from **Reinaldo J. Aguiar Marcano**.

Ryan, Linette, Sarah, Jane, Lauren, Julie, Carole and Kashmir,

Please accept my apologies for the direct outreach. I am sending you this information as I believe it might be related to your previous experiences with these companies (and with the one thing they all have in common).

I am sharing the attached documents because they identify a $20 trillion "Distributed Attack" on corporate sovereignty known as the "Recursive Capture Loop". Rather than explaining the mechanics, I ask that you simply provide these files —including a USPTO-filed Influence Detection System—to your lead economist for an internal audit. The data suggests a $100 billion global liability in uncollected short-swing disgorgements that directly undermines market integrity. Given the scale of this structural risk, I look forward to your agency's professional assessment of these findings.

Best regards,

Reinaldo J. Aguiar Marcano
Former Managing Director, Goldman Sachs | Former Staff Software Engineer, Google
