TO: The Honorable Attorneys General of the Fifty United States, serving as Chief Legal Officers for the State Executive Branches.

As a way of introduction, my name is Reinaldo Aguiar. I am the Principal at a firm specializing in the foundational architectures for **state digital infrastructure**, **high-precision surveillance**, and **systemic influence modeling**.

Leveraging my background as a former Managing Director at **Goldman Sachs** and Staff Engineer at **Google** and **Twitter/X Corp**, I have developed a portfolio of fifty foundational patent applications that intersect directly with the modern operational topologies of state governments. This notice specifically addresses the unauthorized implementation of frameworks currently deployed or under development by state executive branches, including:

- **Data Center Modernization:** The use of physically disaggregated computing systems and segregated resource pools for AI-driven state infrastructure.

- **Highway Patrol & Border Security:** Coordinated multi-vehicle surveillance scanning and rolling environment mapping.

- **Election & Political Analytics:** Systemic graph-theory modeling for power holder analysis and "Influence Smearing" algorithms.

- **Executive Information Security:** Acoustic analysis of keystroke metadata and side-channel leak-proofing for confidential deliberations.

Because the irrevocable no-fee federal license for this portfolio explicitly **excludes all state and local governments**, your state's current trajectory creates significant liability under the *Ex parte Young* doctrine. This introduction serves to initiate the formal due diligence and compliance protocols required to mitigate impending injunctive relief.

3. Defensive Publication Disclosure made to the European Patent Office (EPO).

4. Declaration D132.

Sincerely,

Reinaldo Aguiar Marcano
